Troubleshooting

Symptom	Cause(s)	Resolution			
Mixer not turning	Mains water supply turned off	Turn on the mains water supply			
on	Closed isolation valve	Open isolation valve			
No hot water	Cold override	Check if the pressure is balanced. Fit pressure equalising valve.			
	Water supply failure	Investigate water supply, check plumbing and heating system for any faults			
Low flow rate/no flow	Partially closed isolation valve	Open isolation valve			
	Air lock or partial blockage in the supply pipework or hoses	Flush through pipework to ensure removal of debris and any airlocks			
	Water being drawn off elsewhere causing pressure changes or instantaneous boiler temperature changes. Ensure minimum pressure is being met.	Try not to use other water outlets when using the mixer			
Water dripping from the mixer	This is normal for a short time after using the mixer	This is due to residual water tension, the build up of water in the mixer spout.			
	If water continues to drip possible issue with flow control valve.	Please contact our customer care team			
Movement of	Back nuts loose	Ensure Back nuts are sufficiently tightened			
fitted mixer	Extra support may be required depending on the surface the tap is fitted to.	Top hat washers need to be purchased please contact a plumbers merchants.			

Installation Requirements

Before commencing installation of the new product, ensure that the system has been flushed to remove any debris, which could cause damage to the valves and invalidate the warranty.

Installation

1, Remove the back nuts (14) and back nut washer (13) from the threaded connection (12).

2, Push the mixer threaded connection through the holes in the bath, ensuring that the base plates (9) are correctly positioned, fully covering the mounting holes.

3, Place the back nut washer (13) and back nuts (14) back onto the threaded connection (14), under the bath, and screw up until the tap is secured in position (do not overtighten). Please note additional sealant can be used if required.

4, Connect the water supply pipes to the connection threads and tighten, an adequate sealing method should be used to create a water tight seal.

5, Reinstate the water supply and test for leaks.

General Safety Information

Please read all of the instructions before installation.

Methven recommends this product is installed by a competent person in compliance with all relevant regional regulations.

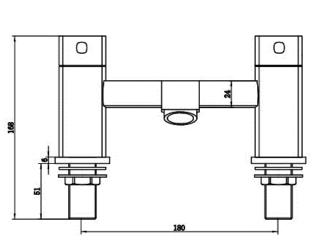

Remove all packaging and check the components for damage before starting installation.

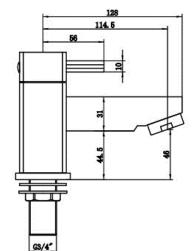

This product **must** not be modified in any way as this will invalidate the guarantee.

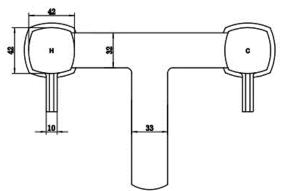

It is the responsibility of the installer to ensure a waterproof seal is achieved, after installation all connections must be checked for leaks.

All outlets used primarily for personal hygiene shall deliver water at a safe temperature as per regional regulations.
