Up-Down Smart Ceiling Lamp
Installation & Set-up Manual
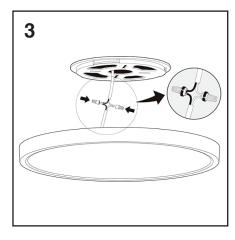

Warning: Please consult a licensed electrician if in doubt.
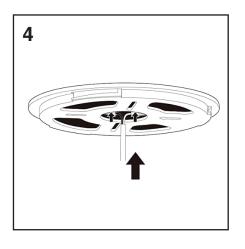

1

Please switch off the circuit breaker before installation & place a sticky note over it to indicate that you are working on this circuit.
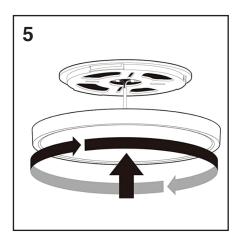

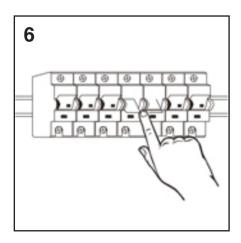

2

Install the mounting bracket

3

Connect the wires together, live (brown) to live & Neutral (blue) to neutral.

4

After the wires are connected, tuck them away.
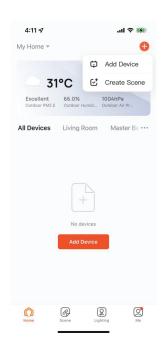

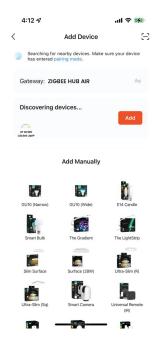

5

Install the lamp & rotate to lock.

6

FInally, switch the circuit breaker back on & begin the pairing process.

Pairing with the Near App.

Before you begin:
1. Make sure that you have an active 2.4GHz wi-fi connection.
2. Ensure that the Up-Down lamp is installed at a place with stable internet connection.

1. The Up-down lamp should enter pairing mode by default after installation for the first time. If not, just switch the light on and off for 5 times consecutively. When the light starts flashing quickly, it is ready or pairing.

2. Enter the Near app, select "Add device" or tap on the "+" icon to add the Up Down Lamp.

3. The Up-Down lamp will appear on the Near App automatically. Tap on the blue "+" icon to begin the pairing process.

4. Once the Up-Down lamp is added successful, click on "Done" & you're all set!
