FRAME FINISHES

The Hug collection is characterized by the possibility of combine table tops in Compactop or Iron, which can also be used outdoors, or in Laminate made of chipboard support material and laminate surface, ABS edged, for the most specific indoor settings. The table is made with a 4-star aluminum base, equipped with adjustable feet, and aluminum column and cross. The Hug tables collection, is now enriched with new Marble and Porcelain tops, characterized by different veins of stones, contribute to enhance elegance and refinement for the most demanding environments.

QUALITY IN THE NATURAL RESPECT

100% Demountable product
100% Recyclable material
100% Made in Italy

TECHNOPOLYMER

Gaber production employs exclusively high-tech thermoplastic materials, which are 100% recyclable. Gaber produces plastic injected materials without added chemicals. These materials are purchased within the European Union, so Gaber is exempted from registration with ECHA agency (European Agency for Chemicals Substances), in the complete respect of "Reach Regulation".

MARBLE AND PORCELAIN TABLE TOPS

The Porcelain stoneware tops stand out for their excellent technical performance, ideal for the most delicate uses where maximum hygiene and resistance must be guaranteed. Porcelain tops are compatible with foodstuffs, resistant to fungi and molds, suitable for both indoor and outdoor use, resistant to frost, heat and high temperatures, they can be cleaned very easily while maintaining the characteristics of the surface. The solid Marble surfaces, are treated to reduce their porosity, however constant care and cleaning of the product is recommended.

METAL

Gaber metal structures, in the full respect of our Natural Environment, are available with "trivalent" chroming and painted finishes. Prime-quality special Epoxy powder coating used on Gaber frames enhance color stability from batch to batch and over time, increasing its corrosion-resistance and achieving excellent resistance to atmospheric agents.

CARTON BOXES

Corrugated paperboard carton boxes, printed with environmentally friendly inks, are made of 90% recycled and recyclable materials. Packaging is sized in order to optimize storage and transport requirements, both helping the environment and saving on transport costs.
