- L-keys for recessed TORX® screws
- The holding function on the long arm keeps screws securely on the tool
- BlackLaser for high corrosion protection and long service life
- Laser-engraved and thereby wear-resistant size markings
- Zinc phosphate plated

High quality L-keys for recessed TORX® screws. With holding function (HF) on the long arm to securely hold the screw on the tool. Comes with extra-long arm. The BlackLaser surface treatment provides outstanding surface protection, even against corrosion, and a long service life. The tools are quickly to hand thanks to the laser-engraved and thereby wear-resistant size markings on the L-keys.

L-Keys for TORX® Screws

Holding function for recessed TORX® screws

The HF tools developed by Wera are ideal because they feature an optimised geometry of the original TORX® profile. The wedging forces resulting from the surface pressure between the drive tip and the screw profile mean that TORX® screws made according to Acument Intellectual Properties specifications are securely held on the tool!

Size identification

The size of each L-key has been engraved by a laser. In addition, the L-keys have a colour coding according to sizes - for simple and rapid accessing of the required tool. Making it easy to find the right tool.
