

The Give'r Garage Oven Method

Expedite your glove/mitten break-in process!

1 Turn on your oven to **200 degrees**.

2 Once heated, put your gloves/mittens in the oven. “**A-Frame**” the pair with thumbs out to ensure the clips on the side do not burn.

3 Set a timer for **4 minutes**.

4 After 4 minutes, take your gloves/mittens out and **put them on while they are still warm**.

5 Use the pair for activities like shoveling, pull-ups, or just **making fists**. These grabbing actions help break-in the leather and form the gloves/mittens to your hands quicker.

6 **Enjoy!**

*** Make sure you do not leave your gloves/mittens in the oven longer than the recommended 4 minutes. Give'r is not accountable for gloves/mittens that are forgotten or were not properly placed in the oven - leading to damage. ***
