Dr.meter

Dr.meter soil moisture meter

Model: S30

Important Notes:

1.Remove stones, leaves, grass, etc. from the surface of the soil,and then insert probe to root level slightly.

2.If the soil is too dry the indicator will not move, and water it and test it after 15-20 minutes.

3.Wipe the probe metal surface with a soft cloth before measuring.

4.Do not leave the meter in the soil for over 1 hour.

5.Do not use it to test pure water or other liquids. It can only be used to measure soil.

6.Remove probe from soil and wipe clean after each use.

SKU : M03-0980N-01
Made In China

Instructions

Moisture
- Push switch to the left.
- Insert probe deeply into soil reaching root level . Keep probe close to plant.

Note: Refer to the chart below for your plant's watering needs.

Light
- Push switch to the center.
- Facing the light source, hold the meter next to the plant. Avoid touching sensing element located underneath gauge.

Note: Refer to the chart below for your plant's light requirements.

Soil PH
- Push switch to the right.
- Insert probe deeply into soil.
- A PH reading greater than 7 is alkaline, while a reading less than 7 is acidic.

Note: Most indoor plants prefer a slightly acidic soil with a PH between 6.5 and 7. Soil that is highly alkaline will cause the leaves to lose their color and stunt the growth of the plant. Acidic soil will cause the leaves to wilt and drop.

Plant watering guide

Red Zone : Plants 1-3

Aloe
Anchor Plant
Asparagus Fern
Baby Jade
Baby Pine of China
Baby's Breath
Beaver Tail
Bishops Cap
Bloodleaf
Cactus
Chicken Gizzard
Christ Plant
Crassula
Crown of Thorns
