## 1 ROAMA PRODUCT INTRODUCTION

Thank you for purchasing the ROAMA Essential Oil Diffuser. This product is designed for indoor, outdoor, and travel use.

Please read this Users Guide carefully before using.

Diffuser

Fitment  
& Bottle

USB  
Cable

## 2 ROAMA BOTTLE INSTALLATION

To remove the fitment, place your finger on the button at the base of the diffuser. Press firmly until the fitment raises upward.

Lift the fitment straight up to remove.

Remove orifice from bottle with tool.

Rotate the bottle to the right to attach.

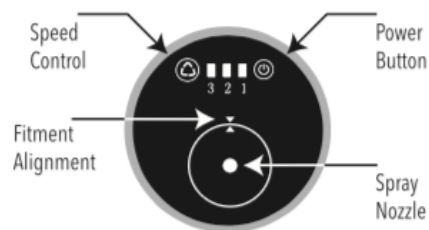

Rotate the bottle to the left to remove.

To reinsert fitment, align the two arrows on the top of the ROAMA while lowering the fitment into place and press down.

### 3 ROAMA CONTROL PANEL

The ROAMA Diffuser has an LED lit touch button control panel on the top. When the power is on, and the unit is charged, the power and cycle indicator buttons will be blue.

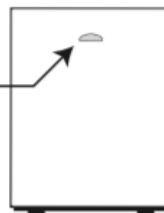

There are 3 speeds for variable intensities. 1 is the lowest speed for smaller spaces, and 3 is the highest for larger, open areas .

### 4 ROAMA CHARGING INSTRUCTIONS

The ROAMA Diffuser has a built-in battery. It is best to fully charge the unit prior to the first use.

Attach the factory supplied USB cord to the diffuser and connect to a USB port in a mobile charger, a computer, or vehicle.

The power switch indicator will flash during the charging process, and turn solid blue once it is full charged. A full charge can last up to 80 hours.

## 5 ROAMA SAFETY PRECAUTIONS

- Do not tip unit when oil is in the ROAMA.
- Always turn off the power switch when changing the essential oil bottle.
- To clean, fill spare bottle with 2/3 alcohol and atomize until finished.
- Never replace fitment without a bottle attached.
- To store unit for an extended time, remove the oil bottle and fitment from the unit and clean nozzles. *Store detached.*
- There is a safety timing function that will automatically turn off the unit after 2 hours.

## 6 ROAMA TROUBLE SHOOTING

Question: Why won't my diffuser turn on?

Answer: It must be charged before use.

Question: Why is there no mist?

Answer: Check to make sure there is oil in the bottle and that it is installed correctly, and that the fitment is oriented correctly and flush with the top.

Question: Why does the mist change intensity?

Answer: The ROAMA Diffuser has a self-regulating function to minimize the usage and get the most out of the oil. This is a normal process.
