Reef Edition

EDGE REEF LED AQUARIUM LIGHTS

The revolutionary, feature-rich EDGE REEF LED Fixtures from Aquatic Life are a game changer in the realm of outdated, overcomplicated reef lighting systems. These sleek, low-profile fixtures measure only 0.5" high & 4" wide, making them almost invisible over your tank.

State of the art LED technology ensures maximum light output is focused inside the aquarium, while six colors of 120° dispersion, 0.5W Watt LED's ensure a full-spectrum of light needed for reef aquariums.

- **Combination of LED colors provide optimal light for reef aquariums**
- **Built-in battery backup keeps timer running during a power outage**
- **LED's extend the full length of the fixtures, providing more light over the aquarium**

EDGE Available in two sizes to fit most aquariums

Example of programming a 90 minute Sunrise & Sunset with Moonlight

Channel 1 - Color LED's
START - 8:00 am END - 8:00 pm

8:00 am: Color LED's come on & gradually increase in intensity over a 90 minute period.

8:00 pm: Color LED's begin a 90 minute decrease in intensity until completely off at 9:30 pm. "END" time is when the "Sun" begins to set.

Channel 2 - White LED's
START - 10:00 am END - 5:00 pm

10:00 am: White LED's come on & gradually increase in intensity over a 90 minute period. White LED's are at full intensity from 11:30 am to 5:00 pm.

5:00 pm: Begins a 90 minute decrease in intensity. Completely off at 6:30 pm.

Moonlight - Blue Lunar LED's
START - 8:00 pm END - 12:00 am

8:00 pm: Blue Lunar LED's come on with an intensity of 5%. The Moonlight overlaps the Sunset of the Color Channel, providing a nice transition between Daylight & Moonlight.

12:00 am: Moonlight ends.

The Sunrise & Sunset can be adjusted to occur from 10 minutes up to 2 hours. It can also be turned off if desired.
