EDGE LED AQUARIUM LIGHTS

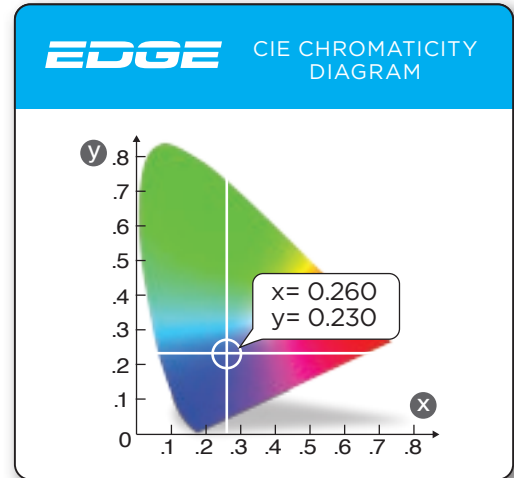

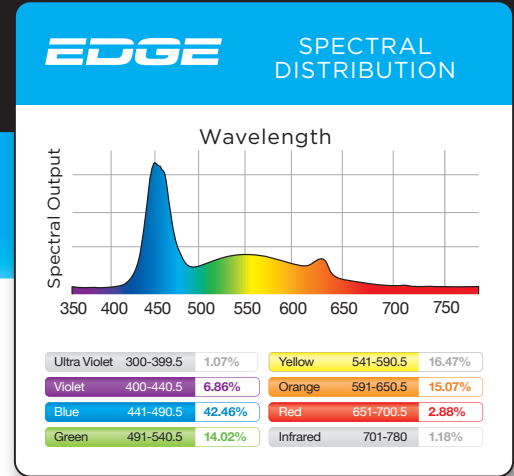

The revolutionary, feature-rich EDGE LED Fixtures are game changers in the realm of outdated, over-complicated LED lighting systems. These sleek, low-profile fixtures measure only 0.5" high and 4" wide, making them almost invisible over your tank.

State-of-the-art LED technology ensures maximum light output is focused inside the aquarium, while five colors of 120-degree dispersion, 0.5W Watt LED's ensure a full spectrum of light for all tank inhabitants.

- **Higher wattage means more light for your aquarium – up to 72 watts!**
- **Built-in Battery Backup** keeps timer running during a power outage.
- **LED's extend the full length of the fixtures, providing more light over the aquarium**
