

## INSTALLATION & MAINTENANCE GUIDE

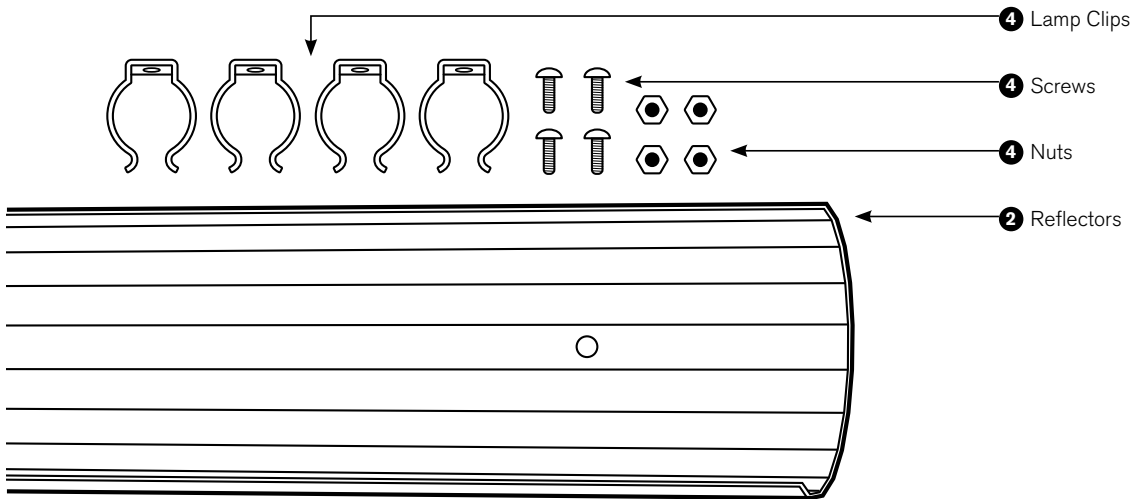

# REFLECTOR RETROFIT KITS

Item #	Product Description
420226	24IN Polished Single Lamp Reflector w/Clips
420227	36IN Polished Single Lamp Reflector w/Clips
420228	48IN Polished Single Lamp Reflector w/Clips

# REFLECTOR RETROFIT KITS

## PARTS LIST

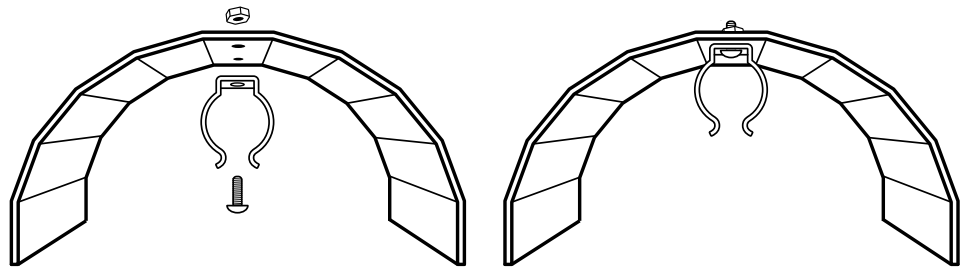

## LAMP CLIPS

Insert one (1) Screw through one of the Lamp Clips; insert the Screw with the Lamp Clip into the predrilled hole located in the Reflector.

Thread the Nut onto the Screw and secure the Lamp Clip to the Reflector. If necessary, use a Phillips head screwdriver to tighten the Screw and Nut.

The Screw and Nut needs to be tight enough so that the Lamp Clip does not rotate on the Reflector.

Each Reflector requires two Lamp Clips.

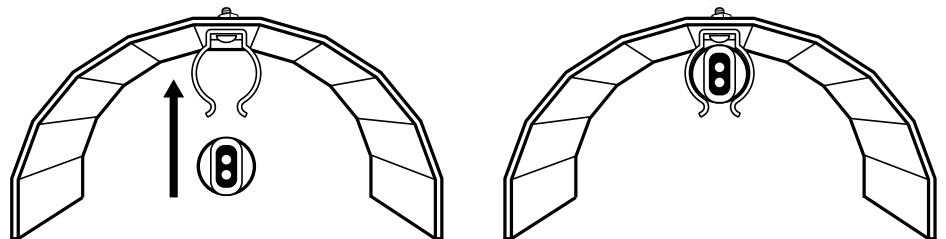

## LAMP ATTACHMENT

After attaching both Lamp Clips to the Reflector, the lamp can be inserted into the Lamp Clips.

Position the lamp above the opening in the Lamp Clips and gently press the lamp into the Lamp Clips.

The lamp will snap into place.

## MAINTENANCE

It is recommended that the Reflectors not be in direct contact with splashing water, as it will cause the Reflectors to dull and loose its ability to reflect light efficiently.

If water or material from the water builds up on the Reflectors, use vinegar or distilled water to remove.
