

WHAT IS STRIKEHOLD?

StrikeHold is a fast-acting compound that penetrates through dirt, rust, and corrosion. It quickly gets into metal parts that have become frozen or encrusted, bringing them back to life.

StrikeHold Benefits:

- ✓ Provides a shield-like film to prevent moisture and corrosion, even against saltwater, whilst repelling sand, dirt, and dust.
- ✓ Displaces water, meaning it dries out wet electrical gears and any other water-sensitive parts.
- ✓ Capillary action, meaning it will crawl and spread into all the tiny, hard-to-reach places, completely coating, protecting, lubricating and cleaning.
- ✓ Clear, dry finish. NO sticky, oily, wet, or smelly residue.
- ✓ Non-flammable so it is safe to use near sparks and flames.

It can be used for 1000's of applications.

What will you use it for?

PROUDLY ENDORSED BY:

There have been no sponsorship arrangements between Peter 'Spida' Everett, Sheree Everett and StrikeHold Australia.

STRIKE HOLD AUSTRALIA

CLEANER LUBRICANT PROTECTANT RUST PREVENTOR

www.strikehold.com.au

Boating | Jet ski | Fishing

- Protection from salt water corrosion, rust and tea-staining
- Repels moisture to prevent malfunction of circuits eg on trailers
- Spray the entire engine to lubricate all moving parts, to provide a long-lasting, dry, clear protective coating
- Repels sand and salt water corrosion from fishing tackle and reels

4WD | Mechanics | Power Tools

- Seals undercarriages to prevent sand and dirt sticking
- Use on moving parts to keep things running smoothly, to prevent corrosion and rust
- Lubricates bike chains without that 'yucky' black grease
- Waterproofs, cleans and protects electrical power tools
- Home maintenance eg. squeaky door hinges

Mining | Agriculture | HVACs

- Prevents rust and corrosion on machinery and tools in wet environments, such as underground mine sites
- Cleans and protects heavy machinery, equipment and tools in dirty and dusty environments
- Stops corrosion of cooling coils in HVACs and UV breakdown
