

## STRIKEHOLD FIELD TEST

# Outboard Engine Service and Maintenance

The high-performance anti-corrosion lubricant/penetrant stops and prevents saltwater rust and corrosion on all metal parts. Used by the US Navy, US Coast Guard and USMC. This product was developed for the use in the most extreme conditions, synthetic based additives completely penetrate into metal parts, displacing the moisture. Providing a long-lasting, non-greasy, clear protective coating that protects all metals from rust and corrosion. Contains no wax, silicon, Teflon or graphite to gum up mechanisms.

Remove your engine cowling and spray the entire engine down and powerheads with StrikeHold Marine. Lubricate ALL moving parts, such as the shift and throttle linkages, engine tilt, batteries, steering and carburetors. Also, apply to ALL electrical connections,

disconnect spray and re-connect all terminals, lights, circuit panels, and marine electronics. The 40k watt dielectric/ non-conductive strength will improve electrical performance by cleaning/ protecting contacts and internal parts from corrosion and from the connections failing when you need them most.
