

HOT TUB HIGHLIGHTS ACRYLIC SPAS

DIVERSE SEATING ARRANGEMENTS

BUILT-IN STEP

Designed to act as an easy entrance-point to the spa and stippled for a better grip.

NO-FLOAT LOUNGER

An ergonomic No Float lounger that can comfortably accommodate Designed to keep users in place

CAPTAINS CHAIR

Ideal seating for a strong massage Well outfitted with jets and a comfortable LED headrest.

BARRIER-FREE SEATING

Allows user to stretch out and massage areas not usually targeted as they are not confined.

OVERSIZED FOOTWELL

Oversized footwell size comfortably accommodates all users feet without contact and includes foot jets.

HYDROTHERAPY JET CUSTOMISATION

Interchangeable

Two different styles of jets present in our spas: directional, rotational. Each provides a different aspect to the overall hydrotherapy experience.

Each jet can be interchanged with any other jet of the same size. This means ultimate individual customisation for every seat in the spa.

Our diverter valve lets you concentrate the full power of our large 5 hp pump to one or both sides of the spa giving you full control of the flow volume.

Every jet is capable of hydrotherapy and equipped with an air control valve. This controls the amount of air mixed into the water to further adjust the massage pressure level and increase blood circulation.

Adjustable

All jets are individually controlled and adjustable. This includes the ability to increase/decrease the flow of each jet by rotating the faceplate which allows for complete control over the massage.

MOST EFFICIENT HOT TUB PLUMBING

No right angle restrictions in our plumbing means better flow-through and less resistance placed on the pump. This leads to a more efficient system built to last for many years.

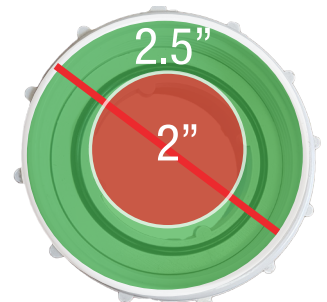

CAT. NO.	TT506
MODEL	R63MWENB-4728

Components from Leading Manufacturers

Our Industry Leading 16A 5HP 2 speed pump provides more than any other pump on the market to circulate the spa water and provide a deep hydrotherapy massage.

Our oversized 2.5" intake is over 35% more efficient than the industry standard of 2" for maximum flow.

Built in heater provides energy efficient hot water and is controlled by our digital control pack. Energy saving features and a daily purge to keep hot tub pristine.

FILTRATION SYSTEM

Our Digital filtration system guarantees clear water with 75% less Chemicals

- 1. Pre-Filter** - Fine mesh screen to prevent your filters becoming clogged
- 2. Silver-Ion** - Embedded into the plastic of the filter, acts a natural disinfectant and our Microban® inhibits the growth of bacteria especially when the spa is cycling and not running, bacteria is most likely to grow in the filter and increase chemical demand.
- 3. Ozone Purifier** - Generates Ozone to aid in the oxidation of the spa water & reduce chemical use by over 75%
- 4. Mazzei Injector** - Produces smaller bubbles and our Ozone Mixing Chamber breaks up Ozone bubbles to maximum absorption

ENERGY EFFICIENT INSULATION = Low Cost

Our heat reclamation system works by storing and reusing the heat created by the spa equipment. Most heat generated by the spa is reused efficiently without being wasted.

The base is designed with high-density closed cell foam and a layer of the same infrared reflective material found on the cabinet walls. This prevents heat loss through the base, saving the owner money in energy costs.

High-density closed cell foam surrounds the shell protecting it from heat loss. Each cabinet panel includes high-density closed cell foam lined with an infrared reflective layer. This creates a hot air barrier to trap and retain heat.

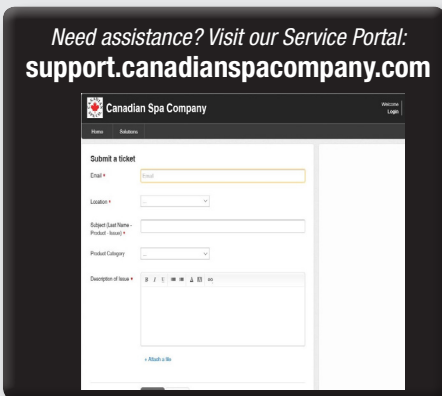

COVER COMPARISON

Canadian Spa Cover:	Other Covers:
25% better insulation	Thinner cover
No heat loss through middle seam	Less heat efficient cover
Easy to lift cover from all sides	No side handles
Skirt completely seals spa	Shorter skirt does not seal spa

Warm air rises, the majority of heat is lost through the top of the spa, this cover helps to retain this heat.

Need assistance? Visit our Service Portal: support.canadianspacompany.com

SERVICE PORTAL

Our Service portal has many of the FAQ's to easily answer your hot tub questions.

Submit a ticket in our system and our global team will effectively solve your issue quickly and efficiently 24/7

CURBSIDE DELIVERY

Our couriers will arrange with you for a convenient time to drop off your spa

OPTIONAL GARDEN PLACEMENT

WHITE GLOVE BACK GARDEN DELIVERY FORM

Upload your information to our site and our experienced team will provide you with a quote to move your spa from the Curb to your Garden, and remove the packaging and install the accessories
