

PIVOT ARM AWNING

PRODUCT DESCRIPTION

Ideal for sliding doors or windows, the arms pivot from the centre to easily create overhead shade or completely cover the opening.

The inclination of the spring-loaded arms provides precisely the right angle to allow for shade while permitting light and airflow, creating a larger area between the awning and the window or opening.

OPERATION

- Gearbox Operation
- Remote Control

SPECIFICATIONS

MAX WIDTH: 3900mm
MAX HEIGHT: 2400mm
MAX m²: 10m²
