

New Low-Fusing Powder Glaze & Stain System

The all-new Vintage Art Universal by Shofu is a low-fusing stain and glaze system. Unparalleled handling properties allow for a wide variety of advanced characterization effects. With vibrant colors and fluorescent powders, you can easily enhance and beautify your overall staining technique for a natural look across all ceramic materials.

Universal All-Ceramic System

Although these materials are designed to fire at low-fusing temperatures, they easily accommodate firing high-fusing ceramics as well. This versatility saves you money and inventory by not having to purchase multiple stain and glaze systems. Vintage Art Universal is your all-in-one ceramic staining solution!

STANDARD FIRING SCHEDULE

Veneered Lithium Disilicate	730°C - 740°C
Full Contour Lithium Disilicate	740°C - 750°C
Veneered Zirconia and PFM Restorations	750°C - 800°C
LayZir All Indication Layered Zirconia Disc	790°C - 810°C
Monolithic Zirconia/Porcelain Teeth	800°C - 850°C

Smooth Handling and Texturing Effects Enhance Creative Range

Vintage Art Universal has a microfine-particle structure and high glass content which offers easy handling and precise application in very thin layers. This feature allows for effortless reproduction of both internal and external shade nuances of natural teeth. Vintage Art Universal customizes with outstanding coverage allowing for a wide variety of 2D and 3D effects for superior characterization.

Yamamoto Liquid by Shofu

Finally... See what you've been missing! Yamamoto Liquid has a distinctively high viscosity exhibiting a glass-like refractive index. This property allows the "True Color" of stains to be revealed during application, without changing after firing. With Yamamoto Liquid and Vintage Art Universal... What you see, is simply what you get!

Fluorescent GP-F Glaze can be mixed with Yamamoto Liquid for a precise, no-drip, consistency during application. Indicated for all-ceramic cases, easily reproduce highly intricate 3D staining techniques on par with layered restorations. Thanks to world renowned Master Ceramist, Makoto Yamamoto; now everyone has the secret ingredient to master their artistry.

Express Nature to the Fullest with Vitality

With vibrant color stains, easily recreate complex internal shade effects in various degrees of opacity and spatial depth. In combination with the optional Fluorescent "GP-F" Glazing Powder, you can ensure your restoration looks natural under all lighting conditions.

Fluorescent and Non-fluorescent Glazes:

GP Glaze will not reflect UV light allowing only underlying fluorescence to show through. Ideal for the artistic characterization of non-fluorescent areas such as gingiva.

Fluorescent "GP-F Glaze" GP-F glaze reflects UV light giving the illusion of vitality to non-fluorescent ceramics such as Lithium Disilicate or Zirconia in all lighting conditions.

- Precise Handling and Multi-dimensional Effects Enhance Creative Range
- Low-fusing Universal All-Ceramic Stain & Glaze
- Simplifies Inventory
- Vibrant Powder Stains with Natural Colors and Fluorescence

Taking Restorations to the Next level!

We get it... Stain and Glaze systems are the essence of your artistry. True artistic expression requires a variety of vibrant, yet natural colors, simple and consistent application process, and sculptability of texture to bring out the finest detail. The dental ceramic experts at Shofu have developed Vintage Art Universal, a new low-fusing powder stain & glaze system. Now you can express your creativity to the fullest across all ceramic cases with one easy to use system.

Order Information
