Our Mission

To be the most streamlined and cost effective clinical supply company, by enabling customers to provide phenomenal patient care by enhancing their inventory management and profitability.

Our Story

Our story starts in a small garage warehouse with only a few products and a goal. That goal is to help doctors save money on clinical supplies without sacrificing quality. Having over 10 years of experience in sourcing and inventory management we moved into the dental and orthodontic industry to do just that. We've worked to eliminate the large markups that have plagued the industry for years and sourced the best products for the best prices, and passed those savings on to you, our customers. With an ever changing industry and new technologies and procedures driving the cost of braces down, we want to be there with quality products and unbeatable prices to help you save on supply costs. Today, as the company evolves, it stays true to the values that help hundreds of offices and doctors save both time and money on everyday clinical supplies. Let us help you as we partner together to help you accomplish your goals.

"There is nothing that SmileStream can't find or do for our clinic. I am beyond happy with their service and am completely confident that anyone who uses them will find the same."

Alexis, Thurman Ortho

They Smile. You Smile. We Smile.

NICKEL TITANIUM

SmileStream NiTi archwires are the highest quality medical grade and provide outstanding memory. Allows for a high degree of deflection without causing any deformation of the original archform specifications. Smooth bright finish for reduced bracket friction. Light continuous force for enhanced treatment results.

- SE-Superelastic NiTi Alloy
- High Shape Memory
- Wide Working Field

STAINLESS STEEL

SmileStream Stainless Steel archwires have an extremely high tensile strength and accept intricate bends without breaking. These wires are manufactured with the highest quality medical grade type 304V Stainless Steel.

- Consistent Performance
- High Luster Polish for Reduced Friction
- Etched Permanent Center Mark
- Stain Resistant

NICKEL TITANIUM REVERSE CURVE

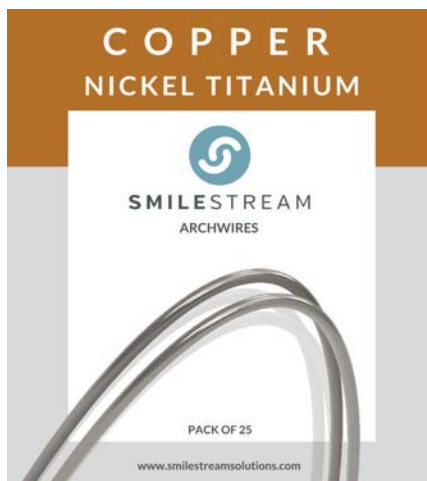

SmileStream NiTi wires are the highest quality medical grade and provide outstanding memory. Allows for a high degree of deflection without causing any deformation of the original archform specifications. Smooth bright finish for reduced bracket friction. Light continuous force for enhanced treatment results. 100% quality control inspected for consistent, repeatable results.

THERMAL ACTIVATED NICKEL TITANIUM

SmileStream Thermal Activated Nickel Titanium archwires have outstanding shape integrity– measurably more resistant to permanent set. Lower forces than Super Elastic Nickel Titanium, making it very comfortable for patients. Lower forces allow for introduction of larger wires earlier in treatment. Thermal Activated Nickel Titanium wires are also soft at room temperature and in doctor’s hands for easier ligation.

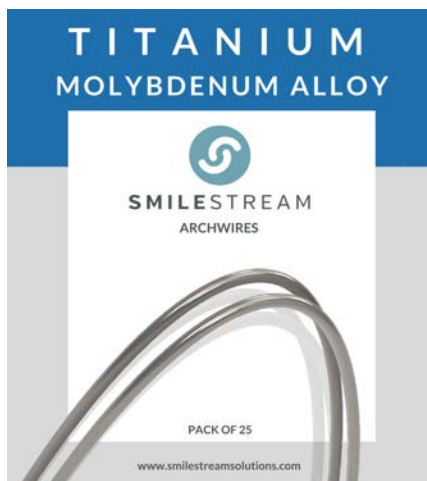

- Fully Austenitic at 90°F
- Easier Ligation in case of severe malposition of teeth

TITANIUM MOLYBDENUM ALLOY

SmileStream Titanium Molybdenum wires are nickel-free with properties that fall between the bend-ability of Stainless Steel and the flexibility of Nickel Titanium. Titanium Molybdenum wires have a smooth, polished surface for excellent sliding mechanics and provides moderate wire stiffness levels at 60% less than Stainless Steel. Titanium Molybdenum wires offer excellent formability, making it ideal for intermediate and finishing stages of treatment.
