**Description**

The commercial grade Nitrile sheet performs well in petroleum oils & fuels, silicone oils & greases, ethylene glycol, dilute acids, and water (below 212° F). Cloth inserted Nitrile is available for added dimensional stability. Diaphragm grade Nitrile provides maximum flex fatigue resistance in dynamic applications.

Thermodyn elastomeric materials manufactured with FDA white list ingredients are compliant to FDA Title 21 of CFR177.2600

Finish:	Plate
Durometer:	60
Tensile:	711 psi
Elongation:	250%
Temperature:	-20°F to +170° F
Color:	White

Most orders ship same day/next day.
