STARRY5 USB LED MAKEUP MIRROR

CREATORS OF YOUR MOST FABULOUS LIFESTYLES

## FROM THE GM

**30 years ago**, a young woman named Stella Karen found herself in the back-stage of Paris Fashion Week. It was there she saw something that would change her life forever. Makeup artists bustling around them like busy bees pulling together some stunning final touches before they hit those runway lights one last time - all while complaining about how quickly models' skin tone changed once they hit the lights. Some models missed a pair of earrings and then some wore the wrong type of accessory. It was a moment to remember.

After fashion week, she quickly headed back to New York in order to make her own designs from scratch. Her goal was to balance between form and functionality without compromising price. In 1993, LUXFURNI's first-ever jewelry cabinet and makeup mirror were born.

**Today**, LUXFURNI is being sold worldwide spanning 4 continents, and manufactures elegant jewelry cabinets and professional makeup mirrors with advance lighting features for critical makeup applications.

LUXFURNI continues to pave the way in advance research to provide the beauty industry with high-end products that make life easier for women all over.
