

# CROWN EXTENSIONS (HALO-STYLE)

12", 14", 16", 18", 20", 22"

## How To Adjust Wire:

- 1.) The wire and micro bead work as a pulley system that adjusts to all head sizes. First, pull on the excess wire with force to slide it through the micro bead.
- 2.) If the wire doesn't budge after pulling hard, use the needle nose pliers to slightly open the micro bead. The wire should not slide through the micro bead without any tension. Tension is required to achieve a proper fit.
- 3.) Once fitted properly, use the needle nose pliers to tightly clamp the micro bead shut. You may also tie a knot with the excess wire in front of the micro bead after it is clamped.
- 4.) Carefully trim the excess wire close to the micro bead.

## How To Apply:

- 1.) Put your crown extension on with the wire 1-2 inches from your hairline. The closer to your hairline the more secure it will feel. It should not be too tight that it feels like it will pop off your head, but comfortable enough to feel secure.
- 2.) Using your Hidden Crown rat tail comb, starting at one side pull the top half of your hair up and over the extension.
- 3.) Continue pulling the top half of your hair up and over the extension all the way around your head.
- 4.) Style to blend with your own hair
