# MEASURING KIT

Perfection begins with the proper fit. Please follow the "Sizing Instructions" below and record your measurements in the box provided.

Send the details by email (photo/scan or typed) to [hello@thesoleworkshop.com](mailto:hello@thesoleworkshop.com) or in the comments section when completing your order. Please do not hesitate to contact us with any questions.

We look forward to crafting this pair for you!

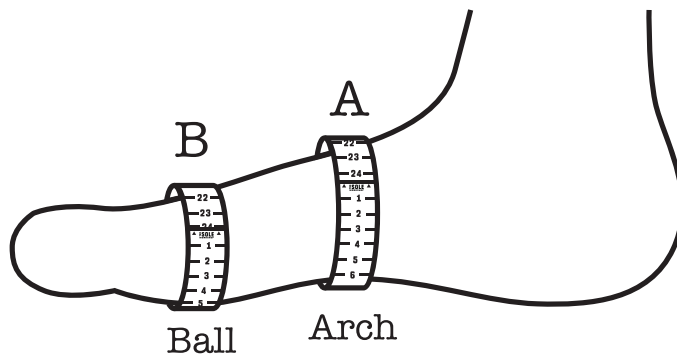

1

Stand barefoot on the template (other side) and find the most accurate size which corresponds to your foot. Keep in mind that the size displayed is to measure the foot length and is not the actual size or shape of the shoe so pick the most exact length. Write your sizes in the box below.

2

Measure the circumference of each foot at points A and B using the tape provided in cm. It is only necessary to make your measurements in whole or half cm. Record your measurements below. For best fit, make sure the tape is pulled snug and always measure twice to check your measurements.

Left size: \_\_\_\_\_

Right size: \_\_\_\_\_

Left A: \_\_\_\_\_

Right A: \_\_\_\_\_

Left B: \_\_\_\_\_

Right B: \_\_\_\_\_

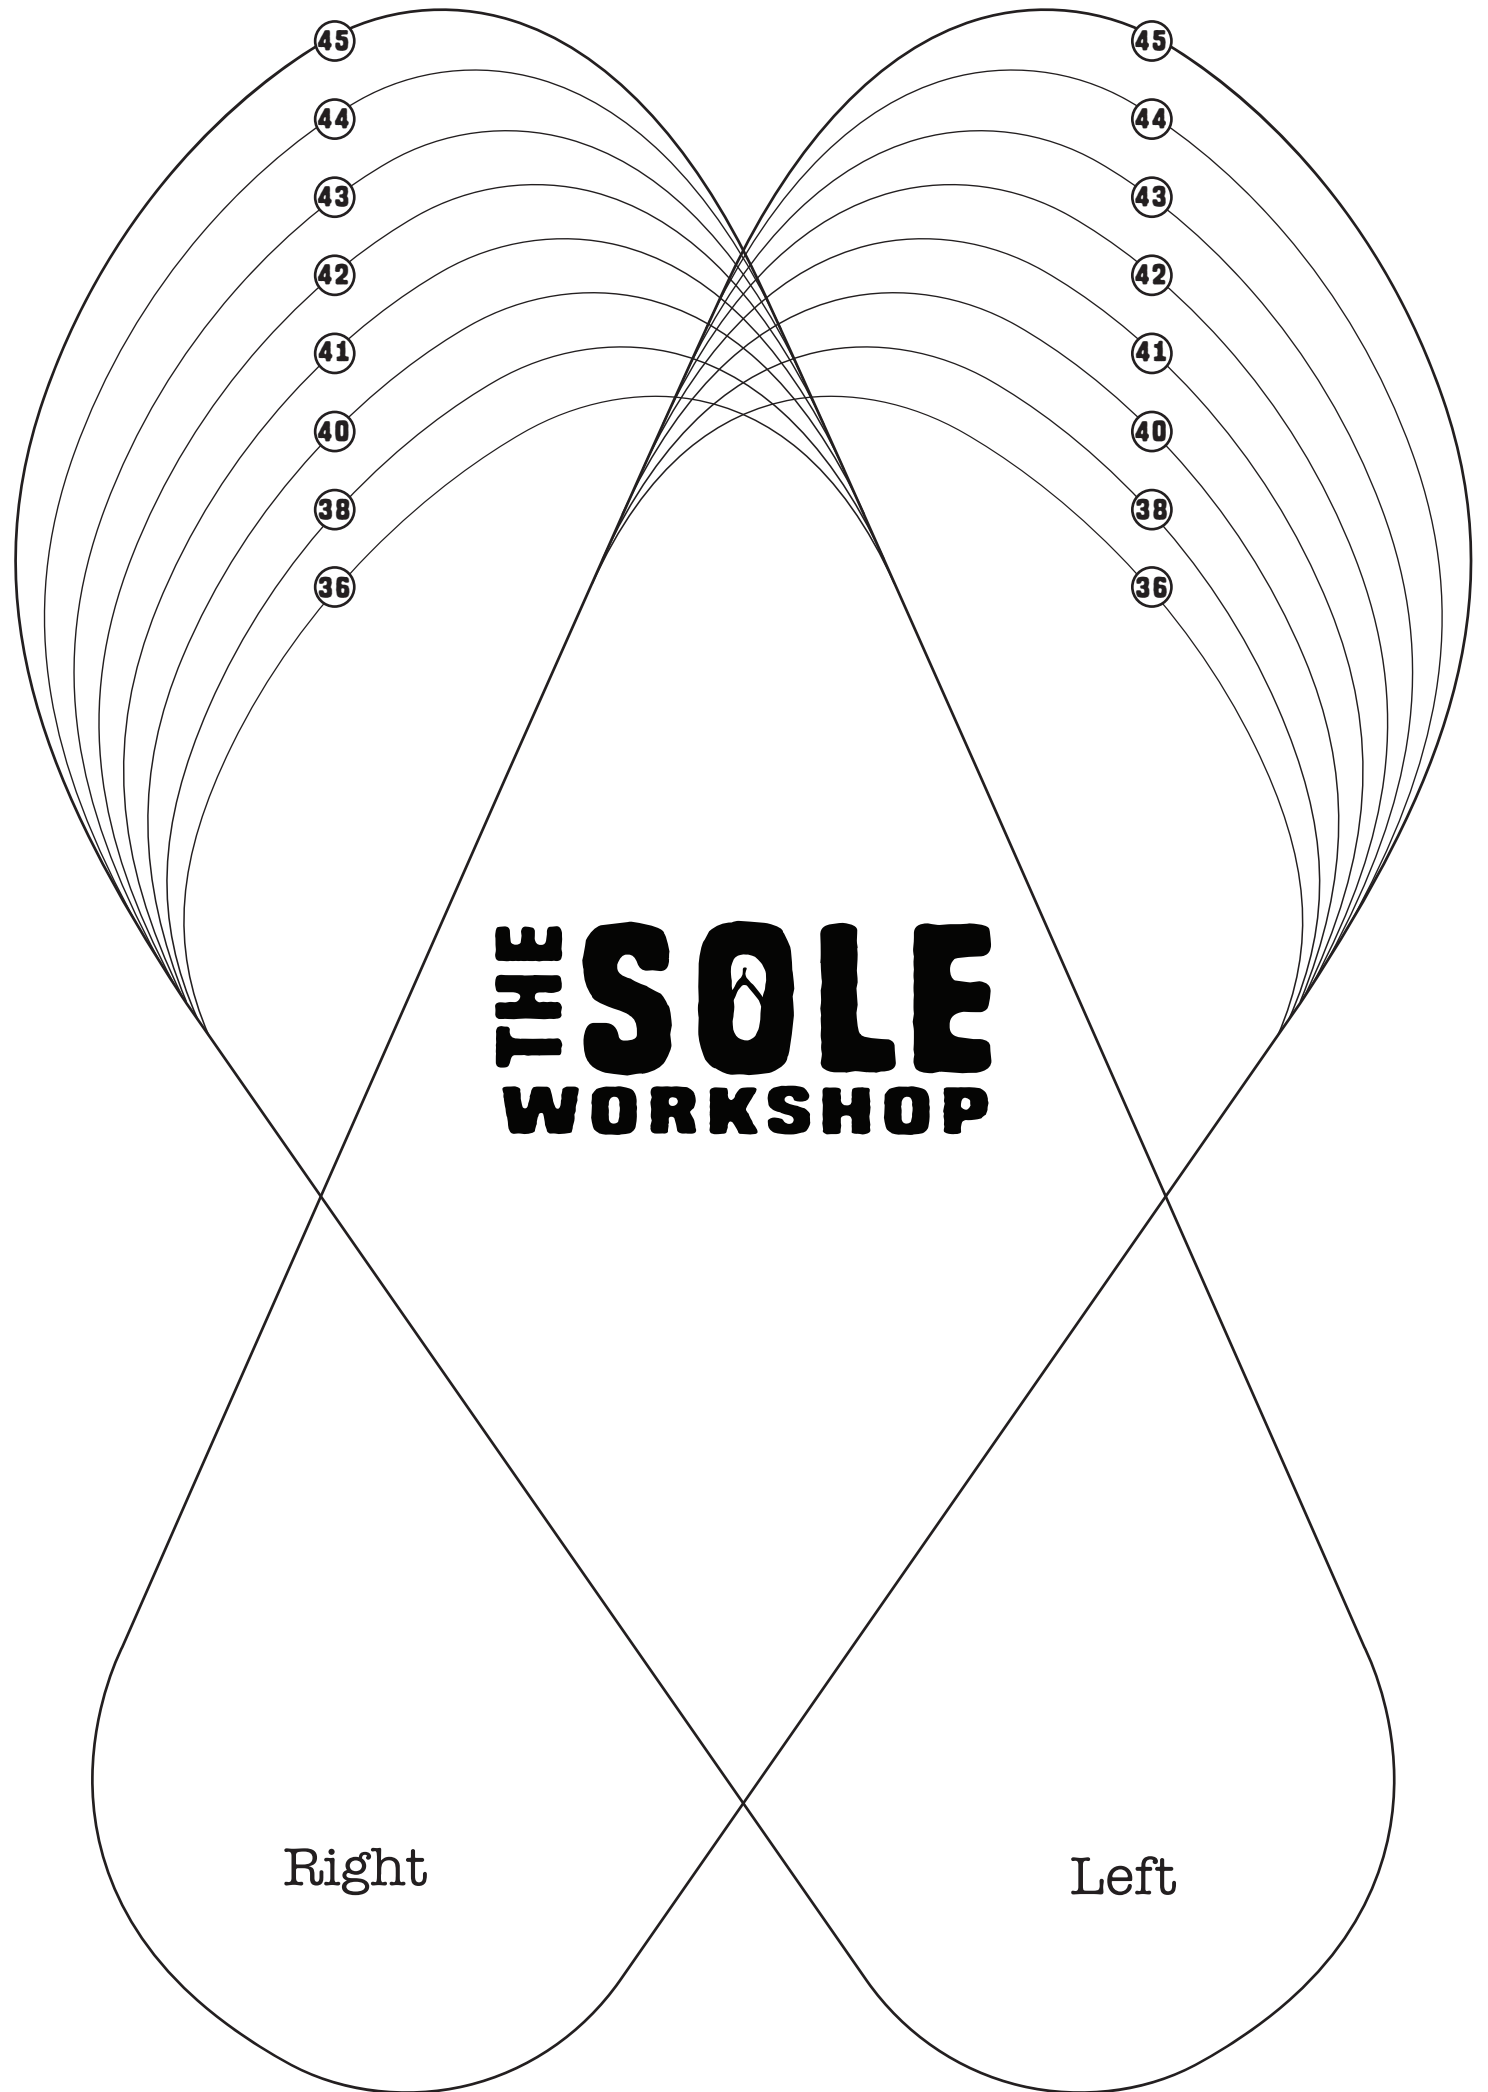

Name or Order Number \_\_\_\_\_
