

SIZING INSTRUCTIONS

1 Stand barefoot on the template and find the most accurate size which corresponds to your foot. Keep in mind that the size displayed is to measure the foot length and is not the actual shape of the shoe so pick the most exact length. Write your size in the box below.

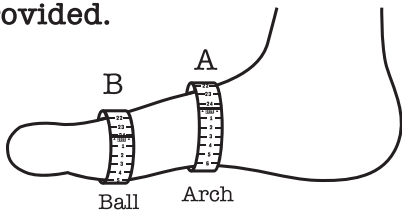

2 Cut out the tape measure on the other side and remove the tab indicated. *You may use a soft tape measure instead if you already have one.

**** US Customers ****
Measurements for step 3 may be given in inches or cm. Please round numbers to the nearest half cm or 1/4 inch.

3 Measure the circumference of each foot at points A and B using the tape provided.

For best results make sure the tape is pulled snug and always measure twice to check your measurements. Record your measurements below.

LEFT		RIGHT	
A	_____	A	_____
B	_____	B	_____
Size _____
