

# Bretford® PureCharge™

## Charging Carts and Stations for iPad and iPad mini

### The ready-to-go iPad charging solution. No cables or power adapters required.

The PureCharge Cart™ 40, Cart 20, Station 20 and Station 10 are the first family of charge-only solutions that are ready to go without the need to add cables or power adapters included with your devices. With the convenience of pre-installed Lightning cables and no setup required, the PureCharge™ products save valuable time and money while freeing up cables and power adapters for use elsewhere in your deployment.

All Bretford PureCharge™ products are Made for iPad (MFi) certified to meet Apple specifications and are listed to the UL 60950-1 standard for safety.

PureCharge™ Carts and Stations feature all-steel construction and Bretford patented thermal management design to ensure devices remain within Apple recommended temperature specifications.

#### **SIMULTANEOUS CHARGE**

Provides simultaneous charging for up to 40 devices.

#### **READY TO GO**

With pre-installed Lightning cables, simply plug in the cart or station and it's ready to go, right out of the box.

#### **OPTIMIZED CABLES**

Cable clutter is eliminated through custom cables that are the optimal length for each slot and the right-angled Lightning connector makes it easy to connect devices.

#### **AT-A-GLANCE STATUS**

Without removing them from the slot, instantly determine which devices are fully charged via the individual charge status LEDs.

#### **SCALABLE**

The PureCharge™ family of products is designed to grow with your organization. Stations can be stacked and the Cart 20 is upgradeable to 40 device slots.

## PureCharge Cart™ 40

## PureCharge Cart™ 20

## PureCharge Station™ 20

## PureCharge Station™ 10

This cart offers greater capacity in a compact footprint. The completely redesigned divider system is reconfigurable offering maximum flexibility for protective cases.

This cart combines charging for up to 20 iPad devices with secure storage for corresponding accessories. Now everything you need to meet the technology demands of your curriculum can be accommodated in a single cart.

The PureCharge Station™ 20 offers greater scalability. Where space is limited, stack up to three units high or individually mount on the wall.

For smaller deployments or where space is the primary concern, the PureCharge Station™ 10 is the most compact, scalable solution. Stack up to three units high or individually mount on the wall.
