

# MONTPELLIER

**TYPICAL USAGE: URBAN/COMMUTE**

**SRP £1,599**

Color	Granite Black Matt with Aqua
Sizes Available	S, M, L, XL
Weight	8.2kg
Frame	6061 Hydro Formed T6 Aluminium, Custom Drawn, Multi Butted with Press Fit BB Shell
Fork	Straight Bladed Full Carbon Front Fork and Steerer
Rear Shock	N/A
Headset	FSA Integrated Road, 1 1/8" Sealed Cartridge Bearings, 41mm Diameter
Rear Hub	Hope EVO, with Stainless Steel bearings, 32 Hole
Front Hub	Hope EVO, with Stainless Steel bearings, 28 Hole
Spokes	DT Competition, 15g/14g Black Stainless with Brass Nipples
Rims	Alex Black Dragon 24, Deep Section, Disk Specific Road, 32 Hole Rear and 28 Front
Tire	Maxxis Detonator, 700 x 28c, Grey, Folding with Puncture Protection
Shift Levers	SRAM SL700, 10 Speed
Front Derailleur	SRAM APEX
Rear Derailleur	SRAM Rival 10 Speed
Cassette	SRAM PG-1050, 11-32, 10 Speed
Chain	SRAM PC-1050
Crankset	FSA Gossamer, 50-34, 10 Speed, Compact
Bottom Bracket	SRAM Press Fit
Seatpost	Whyte 20mm Offset, 27.2mm x 350mm, 2014 Alloy, 2 Bolt Clamp
Seat	SR Viper, with Scuff Guards, Snake Skin Cover
Bar	Whyte Ultra Narrow, 31.8mm, Flat Bar, 580mm Wide
Stem	Whyte, 70mm S, 80mm M, 90mm L & XL
Grips	GP1 Ergon Grip, Dual Density
Front Brakes	Hope X-2 Race, Matchmaker Clamps
Rear Brakes	Hope X-2 Race, Matchmaker Clamps
Brake Levers	Hope X-2 Race
Pedals	None

Built on the same fantastic frame as last year, the 2012 Montpellier gets a more affordable spec, the Hope brakes and hubs are still there and it is still packaged as the ultimate "stealth" bike

Based on our high performance mountain bike geometry, all our Fast Urban bikes have a long wheelbase and relaxed head angle for high speed stability, and a shorter stem for excellent slow speed maneuverability

The Montpellier weighs in at a fraction over 18lbs - unbeatably svelte for a rugged Urban-proof commuter bike

XL	1094	420	27.2	180	533

Based on our high performance mountain bike geometry, the Stirling has a long wheelbase and relaxed head angle for high speed stability, and a shorter stem for excellent slow speed maneuverability

A custom rear dropout allows us to mount the rear hydraulic disc brake caliper inside the rear triangle, clearing the way for any rack or mudguards that may be required

Our shaped, butted and uniquely profiled rear stays give all our Fast Urban bikes a fantastically responsive and comfortable ride, especially when combined with a top quality carbon fibre front fork

Brake Levers	Avid Elixir 1
Pedals	VP Full Alloy with Toe Clip

When we set out to create a range of bikes that would handle all-terrain use we started with the geometry of the frame. 11 years of off-road experience told us that these bikes first and foremost need to handle sweetly, whether riding along a canal tow path, heading down a woodland trail, or beating the traffic on the way through town

A custom rear drop out allows us to fit the hydraulic disc brake caliper inside the rear triangle leaving you plenty of room to fit a rack and mudguards if desired

Full Shimano 9 speed SLX and XT mountain bike components make the Coniston a class act

A wholly unique 29er, built around our agile Whyte Frame Geometry and featuring Shimano's brand new XT 3 x 10 groupset, light weight wheelset and a Fox F100 RL Evolution fork for a benchmark XC package

These frames bristle with UK design features, such as extra mud clearance for all-weather usability, forward facing seat slot to keep rear wheel spray out of the frame, continuous outers for improved cable life and crud-catcher mounts on the downtube to keep the grit out of your teeth

Mud clearance and all weather features have long been associated with our designs and when Whyte set out to design a 29er there was no exception. We have fitted our unique adjustable dropouts, so you can run the chainstays short in the summer and when the weather turns bad, give yourself a whole load more mud clearance by moving the rear wheel backwards

Brand new Shimano XT 2 by 10, a Fox F100 RL Evolution fork and a light weight Whyte X-C 202 wheelset combine to give a benchmark X-C package, that's also "Trail Ready" with its Whyte Frame Geometry

These frames bristle with UK design features, such as extra mud clearance for all-weather usability, forward facing seat slot to keep rear wheel spray out of the frame, continuous outers for improved cable life and crud-catcher mounts on the downtube to keep the grit out of your teeth

The same high quality frameset features on all the X-8 bikes. The custom tubing is drawn to our specification and then profiled, butted and shaped to give what we consider to be the perfect ride feel

Using the same trail geometry developed for the 19, the 905 offers no-compromise performance and sublime handling

The frame is constructed from the highest quality 6061 Aluminium Alloy, extruded and manipulated to our exact specification. The rear seat stays are a work of art internally and contribute in a big way to the 905's outstanding ride characteristics

In a recent review What Mountain Bike Magazine said "it's sharp yet smooth... a superb blend of race speed and technical confidence", giving it an Editor's Choice and a Gold Award

1 by 10 is the new trail bench mark. Featuring an 11-36 10-speed rear cassette and a single chain ring with a light weight chain device, this bike has all the trail taming attributes needed to slay a local DH trail or the steepest of trail center runs - then pop up the block and spin you back up to the top

Whyte has worked with Fox to give the 146 X a fantastic Kashima coated rear RP23 rear shock which exploits the all-new XV2 sleeve to give this bike a "bottomless" feel. At the front end there is Taper steerer tubed Kashima Float 150 "Factory" spec fork with FIT damper. Combine this with a stripped off, raw carbon finish and we have a do-anything trail bike that only weighs 24lbs (medium size) without pedals

We use monocoque technology as it allows us to integrate key parts of the frame in one structure, rather than building separate parts and joining them together later. This has real performance benefits. It's the lightest way to produce a frame that is both stiff and strong

XC FR 146 X

We use monocoque technology as it allows us to integrate key parts of the frame in one structure, rather than building separate parts and joining them together later. This has real performance benefits. It's the lightest way to produce a frame that is both stiff and strong

A full carbon tapered headtube gives us fantastic stiffness which delivers very accurate tracking and steering performance in both low and high speed use. 146mm of rear suspension travel. Complete bike weighs only 25.5lbs (medium size) without pedals

SRAM PF30 bottom bracket improves durability in UK conditions and integrated ISCG05 tabs allow you to easily change your setup to a single chaining with a chain device

Stem	Whyte, 31.8mm Bar Clamp, S & M 70mm, L 80mm
Grips	Whyte Lock-on
Front Brakes	Avid Elixir 7, 180mm Rotor
Rear Brakes	Avid Elixir 7, 160mm Rotor
Brake Levers	Avid Elixir 7 Matchmaker
Pedals	None

The 146 S is built around exactly the same ground-breaking full carbon mono-coque chassis and swingarm as the Works and X models

Whyte designed suspension systems are engineered to perform smoothly for years to come. To back that up, we provide a lifetime warranty on all the suspension pivot bearings

The frame has integrated gravity dropper seatpost hose runs for easy upgrading without the need for unsightly cable ties. 146mm of rear suspension travel. Complete bike weighs only 26 lbs (medium size) without pedals

**XC FRS 146 S**

Confidence inspiring handling is guaranteed with Whyte's Trail Geometry. Custom drawn M6 Magnesium enriched Aluminium main frame is light and strong. Updated design is 1.5lbs lighter than 2011 model

Tapered headtube gives excellent front end stiffness which delivers accurate tracking and steering performance

Full carbon single monocoque swingarm is light, strong and very stiff for exceptional power transfer and rear end stability. The replaceable dropouts come standard with the latest post-mount brake and 12 x 142 Maxle setup, but are interchangeable to future-proof the swingarm

New for 2012 Whyte have applied the Whyte Frame Geometry to the all purpose CX category. The Saxon Cross gives you Whyte's most versatile bike, whether commuting, riding your favorite bridle path or winter training this bike will do it all. Or alternatively go try a CX race this winter, this bike can do it all!

SRAM Apex and Rival combine to give a great power delivery, Avid provide the stopping power with BB-7's and Whyte have designed a truly great all-round frame

A straight bladed carbon fork with a tapered steerer tube give this bike great front end stiffness and steering precision
