SAXON CROSS

TYPICAL USAGE: CYCLOCROSS/ALL TERRAIN

SRP £1,299.00

WHYTE
PERFORMANCE BY DESIGN

Color	Matt Granite/Aqua
Sizes Available	52cm, 54cm, 56cm, 58cm
Weight	9.5Kg
Frame	6061 Hydro Formed T6 Aluminium, Custom Drawn, Multi Butted and Post Mount Disk mount
Fork	Straight Bladed Full Carbon Front Fork with Tapered Alloy Steerer, with Post Mount Dropouts
Headset	FSA Integrated Road, 1 1/2" lower and 1 1/8" upper Sealed Cartridge Bearings
Rear Hub	Whyte Alloy Double Sealed with Cartridge Bearings, 32 Hole
Front Hub	Whyte Alloy Double Sealed with Cartridge Bearings, 32 Hole
Spokes	WTB PG 15g, Black Sandvik Stainless with Black Brass Nipples
Rims	WTB Custom Frequency Team i19 TCS, Tubeless Ready, Disk Specific, 32 Hole
Tyre	WTB Cross Wolf, TCS CX Tyre, DNA Compound, 700 x 33c, Black
Shift Levers	SRAM Apex 10 Speed
Front Derailleur	SRAM Apex, 10 Speed
Rear Derailleur	SRAM Rival, Mid Cage, 10 Speed
Cassette	SRAM PG-1030, 11-32, 10 Speed
Chain	SRAM PC-1031
Crankset	FSA Gossamer Pro Cross PF-386, 36-46, 10 Speed, Compact Double
Bottom Bracket	FSA PF-386
Seatpost	Whyte 20mm Offset, 27.2mm x 350mm, 6061 Alloy, 2 Bolt Clamp
Seat	Whyte Custom, Light Weight Triple Density Base, Triple Panel Design
Bar	FSA Omega Compact, 460mm Wide
Stem	Whyte -6 Deg, 70mm 51, 80mm 53, 90mm 55 & 57
Grips	Whyte Anti Slip, Cross Bar Tapes
Front Brakes	TRP HyRd, 160mm Rotor
Rear Brakes	TRP HyRd, 160mm Rotor
Brake Levers	SRAM Apex with In-Line Bar Top Levers

We have applied our unique Whyte frame geometry to the Saxon Cross, creating Whyte's most versatile all-terrain bike. It's equally at home riding your favourite bridle path, winter training or even commuting. Alternatively, try a CX race this winter - this bike can do it all!

SRAM Apex and Rival combine to give a great power delivery and TRP's new HyRd brakes provide the stopping power to give you unrivalled control on any terrain.

A straight bladed carbon fork with a tapered steerer tube gives this bike great front end stiffness and steering precision.

SAXON CROSS TEAM

TYPICAL USAGE: CYCLOCROSS/ALL TERRAIN
SRP £2,499.00

CROSS RACE: SAXON CROSS TEAM

The Saxon Cross Team is Whyte's off the shelf CX race bike. Whether round the local park or on the 3 Peaks this bike is all you need. Trail oriented geometry makes this bike exceptionally competent and controllable off-road.

SRAM's Force 11 speed group combined with the new RED22 levers give you the world's first fully hydraulic disc road brakes.

Easton's straight bladed EC-90 XD carbon fork with its tapered steerer tube gives this bike great front end stiffness and steering precision.

Whether you're commuting longer distances, winter training or entering summer sportifs, the Whyte road disc range offers Cyclo Cross durability with pure road geometry.

A strong alloy 6061 frame, with mudguard and rack eyelets combined with deep section R-7 wheels and disk brakes will give years of reliable all-season performance.

Shimano Sora 9 speed drive train with compact gearing gives a great spread of gear ratios whether commuting fully loaded or winter training.

Brake Levers	Tektro HDC300
Pedals	Composite with Alloy Cage and Toe Clip

Based on our high performance mountain bike geometry, the Victoria has a long wheelbase and relaxed head angle for high speed stability, a shorter stem for excellent slow speed manoeuvrability and slightly shorter and lower top tube to fit a woman's physique better.

A custom rear dropout allows us to mount the rear hydraulic disc brake caliper inside the rear triangle, clearing the way for any rack or mudguards that may be required.

Our shaped, butted and uniquely profiled rear stays give all our fast urban bikes a fantastically responsive and comfortable ride.

R7 FAST URBAN ROAD WOMEN'S: PIMLICO WOMEN'S

Based on our high performance mountain bike geometry, the Pimlico has a long wheelbase and relaxed head angle for high speed stability, a shorter stem for excellent slow speed manoeuvrability and slightly shorter and lower top tube to fit a woman's physique better.

A custom rear dropout allows us to mount the rear hydraulic disc brake caliper inside the rear triangle, clearing the way for any rack or mudguards that may be required.

The Pimlico takes advantage of SRAM's Via Centro groupset, specifically designed for urban riding with optimised ratios and slightly wider Q factor for a little more heel clearance.

Based on our high performance mountain bike geometry, all our Fast Urban bikes have a long wheelbase and relaxed head angle for high speed stability, and a shorter stem for excellent slow speed manoeuvrability.

A custom rear dropout allows us to mount the rear hydraulic disc brake caliper inside the rear triangle, clearing the way for any rack or mudguards that may be required.

The Cambridge takes advantage of SRAM's Via Centro groupset, specifically designed for urban riding, with optimised ratios and slightly wider Q factor for a little more heel clearance.

SRP £1,499.00

R7 FAST URBAN ROAD: MONTPELLIER

The Montpellier uses a full carbon RC-7 frame and fork. We have incorporated our "Oversize/Undersize" approach from our carbon hardtails to give great power delivery away from the lights, but with class leading comfort.

Based on our high performance mountain bike geometry, the Montpellier bridges the gap between out-right road speed and MTB control, with its long wheelbase and relaxed head angle for high speed stability, and a shorter stem for excellent slow speed manoeuvrability.

The Montpellier takes advantage of SRAM's Via GT groupset, specifically designed for Urban riding with optimised ratios and slightly wider Q factor for a little more heel clearance.

When we set out to create a range of bikes that would handle all-terrain use we started with the geometry of the frame. 13 years of off-road experience told us that these bikes first and foremost needed to handle sweetly, whether riding along a canal tow path, heading down a woodland trail, or beating the traffic on the way through town.

A custom rear drop out allows us to fit the hydraulic disc brake calliper inside the rear triangle leaving you plenty of room to fit a rack and mudguards if desired.

Full Shimano 10 speed using the Deore/XT Trekking groupset for unbeatable performance and reliability.

All the same key design features as the unisex version, with the added benefit of a partially dropped top tube. This increases standover height, while still keeping enough room inside the frame to comfortably fit a water bottle.

Another benefit of the partially dropped tube is the maintained stiffness of the frame (fully dropped top tube frames are flexi and offer less steering control).

Full Shimano 9 speed group to give years of unrivalled performance and puncture resistant tyres for extra reliability and piece of mind.

The Strawberry Hill is Whyte's take on a lifestyle bike. Stylish is clearly the aim but we also wanted to add a technical solution, so that this bike could handle hills and headwinds without drama. A 30-speed Shimano drive train concealed behind a full chain guard gives you performance and elegance.

Comfort was given top priority, with the Strawberry Hill, the Selle Royal Milo saddle is very comfortable but also lightweight. The grips from Ergo are designed to fit your palm on a swept handle bar bike and even the brake levers have a kraton insert to add a tactile and comfortable feel.

Full mudguards, a chainset cover and internal cable routing keep all the moving parts away from the rider.

Front Brakes	Tektro HDC 330, 160mm rotor
Rear Brakes	Tektro HDC 330, 160mm rotor
Brake Levers	Tektro HDC 330 WDS, Adjustable Reach
Pedals	VP Composite Kids

The 401 is the first Kid's bike we've made. Driven by our passion for high-speed bikes we decided to ditch the usual route of making a 24" wheel bike and instead we have created a 26er with a 13" frame. So now your son or daughter can keep up with you on your Whyte 29er.

These frames bristle with UK design features, such as extra mud clearance for all-weather usability, forward facing seat slot to keep rear wheel spray out of the frame, continuous outers for improved cable life and crud-catcher mounts on the downtube to keep the grit out of your teeth.

SRAM's X0 10-speed Grip Shift combined with a 1 by 10 drivetrain gives a totally up-to-date set up. SRAM's Type 2 rear mech keeps the chain under control and a chainguard keeps little fingers safe.

Pedals	VP Composite with Alloy Cage and Toe Clip

The 802 geometry is designed with a slightly shorter top tube and a little more standover height to offer a better fit for women. For 2014 there is a brand new 650b/27.5" high quality frameset which features on all the X-8 bikes. The custom tubing is drawn to our specification and then profiled, butted and shaped to give what we consider to be the perfect ride feel.

These frames bristle with UK design features, such as extra mud clearance for all-weather usability, forward facing seat slot to keep rear wheel spray out of the frame, continuous outers for improved cable life and crud-catcher mounts on the downtube to keep the grit out of your teeth.

Shimano 9 speed drive train, with shorter 170mm cranks and women's anatomic saddle complete the package.

We have taken all our experience in award winning hardtail designs and applied the same unique formula to our 29ers to deliver perfect balance and control.

Our unique Whyte frame geometry is more surefooted than a typical light-weight XC race bike, inspiring confidence on more technical sections.

Lightweight wheels are essential to 29er performance. Whyte's XC-229-S rims combined with CNC machined hubs give a real performance benefit. The front hub features oversize 28mm flanges to increase the front end stiffness.

CARBON PERFORMANCE HT 29ER: 29-C S

We have taken all our experience in award winning hardtail designs and applied the same unique formula to our 29ers to deliver perfect balance and control.

Our unique Whyte frame geometry is more surefooted than a typical light-weight XC race bike, inspiring confidence on more technical sections.

With a tapered steerer tube, 15mm Maxle Lite front wheel interface and the excellent Whyte XC-209-C Carbon wheelset, this bike will not only get you round your favourite XC loop in a record breaking time, it will also give you the control and balance of the very best of our Whyte trail bikes.

Conceived as the ideal Marathon/Endurance ride, our "Award Winning" 100mm travel M-109 bikes are designed for long, high-speed days in the saddle. Our Quad 4 suspension layout creates room for a larger 29" wheel and is built around lifetime bearings for smooth operation today and forever - guaranteed.

Whyte's 29er XC geometry keeps the back of the bike as short as possible, uniquely combining 26" agility with 29er momentum for speed and control.

The M-109 combines Whyte's XC-209 custom wheelset and Maxxis, high air volume Ikon tyres for an exceptional lightweight wheel package - essential for a nimble feel on any 29er.

M-109 XC MARATHON SUSPENSION 29ER: M-109 S

Conceived as the ideal Marathon/Endurance ride, our award winning 100mm travel M-109 bikes are designed for long, high-speed days in the saddle. No faster way to get from A to B XC under your own power.

Lifetime warranty bearings are used throughout the design, giving this bike exceptional durability, in the harshest UK conditions.

Whyte's own design XC-209C Carbon Wheelset guarantees excellent acceleration and manoeuvrability. For 2014 the rims are upgraded to 23mm wide tubeless ready.

The M-109-C Team is the ultimate Marathon/Endurance ride in our 100mm travel line. Designed for long, high-speed days in the saddle. Our Quad 4 suspension delivers efficiency and reliability, built around lifetime pivot bearings for smooth operation today and forever - guaranteed.

The new carbon front triangle reduces weight, as does the all-new XC-209-C Team wheelset. These next generation carbon wheels from Whyte use wide, low-profile 23mm tubeless-ready carbon rims.

Shimano XTR parts combined with an XT 29er ratio chainset and Fox Racing's Factory suspension gives you the benchmark spec for a Marathon bike.

The 901 gets an all new 650b/27.5" frameset in 2014 but the wheel size is not the only change; the new 900 series geometry takes Whyte's latest thinking on trail geometry and implants it into the DNA of this bike.

The frame is constructed from 6061 aluminium alloy, extruded and manipulated to our exact specification. The 901 gains a fraction more travel and stiffness with the 130mm Sektor Gold fork.

The cockpit parts combine with the geometry to give maximum control, a 750mm wide bar and Whyte's new short, wide mouthed, Gravity stem add huge stiffness and precision.

Brake Levers	Shimano

The 909 uses an all new 650b/27.5" frameset but the wheel size is not the only change, the new 900 series geometry takes Whyte's latest thinking on trail geometry and implants it into the DNA of this bike.

The 909 has SRAM's latest version of their revolutionary 1 by 11 drivetrain. This new X01 group has all the features of the XX1 group but uses alloy crank arms. Benchmark Shimano XT brakes, provide the anchors.

Mud clearance and all weather features have long been associated with our designs and when Whyte set out to design this 650b/27.5" frame there was no exception. We have fitted our unique adjustable dropouts, so you can run the chainstays short in the summer and longer in the winter for more mud clearance or singlespeed if that's your thing.

Brake Levers	Avid Elixir 3

Our Quad 4 suspension layout allows us to apply our contemporary 29er Trail hardtail geometry to the 120mm suspension Trail bike category. Short chainstays give this bike the agility of a 650b/27.5" wheel bike but with the inertia and terrain flattening advantages of a larger 29er wheel.

Lifetime warranty bearings are used throughout the design, giving this bike exceptional durability in the harshest UK conditions.

Speed and flow is the name of the game with the T129 range. Keep off the brakes as long as you dare, tip the bike in as hard as you can and try and work out how you have tamed your favourite single track so fast.

T-129 TRAIL SUSPENSION 29ER: T-129 S

Our Quad 4 suspension layout allows us to apply our contemporary 29er Trail hardtail geometry to the 120mm suspension Trail bike category. Short chainstays gives this bike the agility of a 650b/27.5" wheel bike but with the inertia and terrain flattening advantages of a larger 29er wheel.

Reverb Stealth seat post, WTb TCS tubeless-ready tyres and rims and Whyte's all new cockpit finishing with ultra-wide 750mm bars and gravity short stem are just a few of the standout spec on the T-129 S.

Speed and flow is the name of the game with the T129 range. Keep off the brakes as long as you dare, tip the bike in as hard as you can and try and work out how you have tamed your favourite single track so fast.
