## Nitrogen, refrigerated liquid

Safety Data Sheet P-4630

**Extracting Solutions for Success** 

This SDS conforms to U.S. Code of Federal Regulations 29 CFR 1910.1200, Hazard Communication.

Date of issue: 01/01/1979 Revision date: 10/21/2016 Supersedes: 10/03/2014

SECTION: 1. Product and company id	entification
1.1. Product identifier	
Product form	: Substance
Name	: Nitrogen, refrigerated liquid
CAS No	: 7727-37-9
Formula	: N2
Other means of identification	: Nitrogen (cryogenic liquid), Nitrogen, Medipure Liquid Nitrogen
1.2. Relevant identified uses of the substa	ance or mixture and uses advised against
	: Medical applications
	Industrial use
	Food applications
1.3. Details of the supplier of the safety da	ata sheet
	Praxair, Inc.
	10 Riverview Drive Danbury, CT 06810-6268 - USA
	T 1-800-772-9247 (1-800-PRAXAIR) - F 1-716-879-2146
	www.praxair.com
1.4. Emergency telephone number	
Emergency number	: Onsite Emergency: 1-800-645-4633
	CHEMTREC, 24hr/day 7days/week
	— Within USA: 1-800-424-9300, Outside USA: 001-703-527-3887
	(collect calls accepted, Contract 17729)
SECTION 2: Hazard identification	
2.1. Classification of the substance or mix	xture
GHS-US classification	
Refrigerated liquefied gas H281	
Reingerated inquened gas Tizot	
2.2. Label elements	
GHS-US labeling	
Hazard pictograms (GHS-US)	
	GHS04
Signal word (GHS-US)	: WARNING
Hazard statements (GHS-US)	H281 - CONTAINS REFRIGERATED GAS; MAY CAUSE CRYOGENIC BURNS OR INJURY
	OSHA-H01 - MAY DISPLACE OXYGEN AND CAUSE RAPID SUFFOCATION
Precautionary statements (GHS-US)	: P202 - Do not handle until all safety precautions have been read and understood P271+P403 - Use and store only outdoors or in a well-ventilated place
	P282 - Wear cold insulating gloves/face shield/eye protection. cold insulating gloves, face
	shield, eye protection
	CGA-PG05 - Use a back flow preventive device in the piping CGA-PG24 - DO NOT change or force fit connections
	CGA-PG06 - Close valve after each use and when empty
	CGA-PG23 - Always keep container in upright position
2.3. Other hazards	
Other hazards not contributing to the	: Asphyxiant in high concentrations
EN (English US)	SDS ID: P-4630 1/9

# **XTRACTOR DEPOT Nitrogen, refrigerated liquid** Safety Data Sheet P-4630 This SDS conforms to U.S. Code of Federal Regulations 29

This SDS conforms to U.S. Code of Federal Regulations 29 CFR 1910.1200, Hazard Communication. Date of issue: 01/01/1979 Revision date: 10/21/2016 Supersedes: 10/03/2014

**Extracting Solutions for Success** 

classifica		Contact with liquid may cause	e cold burns/frostbite.	
2.4.	Unknown acute toxicity (GHS US)	Ne dete evelleble		
		No data available		
SECTI	ON 3: Composition/Information	on ingredients		
3.1.	Substance			
Name		Product identifier	%	
Nitroger (Main cor	n, refrigerated liquid nstituent)	(CAS No) 7727-37-9	100	
3.2.	Mixture			-
Not appl	icable			
SECTI	ON 4: First aid measures			
4.1.	Description of first aid measures			
First-aid	measures after inhalation :			elf contained breathing apparatus. Keep ial respiration if breathing stopped.
First-aid measures after skin contact : The liquid may cause frostbite. For exposure to liquid, immediately warm frostbite area with warm water not to exceed 105°F (41°C). Water temperature should be tolerable to normal skin. Maintain skin warming for at least 15 minutes or until normal coloring and sensation have returned to the affected area. In case of massive exposure, remove clothing while showering with warm water. Seek medical evaluation and treatment as soon as possible.			mperature should be tolerable to normal s or until normal coloring and sensation have xposure, remove clothing while showering	
First-aid measures after eye contact :		Immediately flush eyes thoroughly with water for at least 15 minutes. Hold the eyelids open and away from the eyeballs to ensure that all surfaces are flushed thoroughly. Contact an ophthalmologist immediately Get immediate medical attention.		
First-aid	measures after ingestion :	Ingestion is not considered a	potential route of exp	osure.
4.2.	Most important symptoms and effects	, both acute and delayed		
		No additional information ava	ilable	
4.3.	Indication of any immediate medical a	ttention and special treatme	nt needed	
None.				
SECTI	ON 5: Firefighting measures			
5.1.	Extinguishing media			
Suitable	extinguishing media :	Use extinguishing media app	oropriate for surroundi	ng fire.
5.2.	Special hazards arising from the subs	tance or mixture		
Reactivit	у :	No reactivity hazard other that	an the effects describe	ed in sub-sections below.
5.3.	Advice for firefighters			
Firefighti	ng instructions :			essure. Take care not to direct spray onto 's directly into liquid; cryogenic liquid can
		and protective clothing. Imm flow of gas if safe to do so, w safe to do so. Remove conta comply with OSHA 29 CFR 1 L—Fire Protection.	ediately cool containe hile continuing coolin iners from area of fire 910.156 and applicat	e self-contained breathing apparatus (SCBA) ers with water from maximum distance. Stop g water spray. Remove ignition sources if if safe to do so. On-site fire brigades must ole standards under 29 CFR 1910 Subpart
Protectic	on during firefighting :	Compressed gas: asphyxiant	t. Suffocation hazard	by lack of oxygen.
Special p	protective equipment for fire fighters :	Use self-contained breathing Contained Breathing Apparat		protective clothing and equipment (Self

## **XTRACTOR DEPOT Nitrogen, refrigerated liquid** Safety Data Sheet P-4630 This SDS conforms to U.S. Code of Federal Regulations 29

**Extracting Solutions for Success** 

This SDS conforms to U.S. Code of Federal Regulations 29 CFR 1910.1200, Hazard Communication. Date of issue 01/01/1979 Revision date: 10/21/2016 Supersedes: 10/03/2014

uacun	g solutions for success	Date of issue: 01/01/1979 Revision date: 10/21/2016 Supersedes: 10/03/2014
Specific methods		: Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat radiation may cause gas containers to rupture. Cool endangered containers with water spray jet from a protected position. Prevent water used in emergency cases from entering sewers and drainage systems
		Exposure to fire may cause containers to rupture/explode
		Stop flow of product if safe to do so
		Use water spray or fog to knock down fire fumes if possible
		If leaking do not spray water onto container. Water surrounding area (from protected position) to contain fire.
Other information		: Cryogenic liquid causes severe frostbite, a burn-like injury. Heat of fire can build pressure in a closed container and cause it to rupture. Venting vapors may obscure visibility. Air will condense on surfaces such as vaporizers or piping exposed to liquid or cold gas. Nitrogen, which has a lower boiling point than oxygen, evaporates first, leaving an oxygen-enriched condensate
		Containers are equipped with a pressure relief device. (Exceptions may exist where authorized by DOT.).
SECT	ION 6: Accidental release	se measures
.1.	Personal precautions, prot	ective equipment and emergency procedures
General	l measures	<ul> <li>Evacuate area. Ensure adequate air ventilation. Wear self-contained breathing apparatus when entering area unless atmosphere is proven to be safe. Prevent from entering sewers, basements and workpits, or any place where its accumulation can be dangerous. Stop leak if safe to do so.</li> </ul>
5.1.1.	For non-emergency persor	nnel
		No additional information available
5.1.2.	For emergency responders	No additional information available
6.2.	Environmental precautions	
		Try to stop release.
6.3.	Methods and material for c	containment and cleaning up
		No additional information available
6.4.	Reference to other section	S
		See also sections 8 and 13.
SECT	ION 7: Handling and sto	orage
7.1.	Precautions for safe handl	ing
Precaut	ions for safe handling	: Wear leather safety gloves and safety shoes when handling cylinders. Protect cylinders from physical damage; do not drag, roll, slide or drop. While moving cylinder, always keep in place removable valve cover. Never attempt to lift a cylinder by its cap; the cap is intended solely to protect the valve. When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.) designed to transport cylinders. Never insert an object (e.g, wrench, screwdriver, pry bar) into cap openings; doing so may damage the valve and cause a leak. Use an adjustable strap wrench to remove over-tight or rusted caps. Slowly open the valve. If the valve is hard to open, discontinue use and contact your supplier. Close the container valve after each use; keep closed even when empty. Never apply flame or localized heat directly to any part of the container. High temperatures may damage the container and could cause the

Nitrogen, refrigerated liquid

Safety Data Sheet P-4630

This SDS conforms to U.S. Code of Federal Regulations 29 CFR 1910.1200, Hazard Communication.Date of issue: 01/01/1979Revision date: 10/21/2016Supersedes: 10/03/2014

### 7.2. Conditions for safe storage, including any incompatibilities

Storage conditions

: Store in a cool, well-ventilated place. Store and use with adequate ventilation. Store only where temperature will not exceed 125°F (52°C). Firmly secure containers upright to keep them from falling or being knocked over. Install valve protection cap, if provided, firmly in place by hand. Store full and empty containers separately. Use a first-in, first-out inventory system to prevent storing full containers for long periods

**OTHER PRECAUTIONS FOR HANDLING, STORAGE, AND USE:** When handling product under pressure, use piping and equipment adequately designed to withstand the pressures to be encountered. Never work on a pressurized system. Use a back flow preventive device in the piping. Gases can cause rapid suffocation because of oxygen deficiency; store and use with adequate ventilation. If a leak occurs, close the container valve and blow down the system in a safe and environmentally correct manner in compliance with all international, federal/national, state/provincial, and local laws; then repair the leak. Never place a container where it may become part of an electrical circuit.

### 7.3. Specific end use(s)

None.

connections.

None necessary.

### SECTION 8: Exposure controls/personal protection

8.1. Control parameters		
Nitrogen, refrigerated liquid (7727-37-9)		
ACGIH	Not established	
USA OSHA	Not established	
8.2. Exposure controls		
Appropriate engineering controls	<ul> <li>Oxygen detectors should be used when asphyxiating gases may be released. Systems under pressure should be regularly checked for leakages. Provide adequate general and local exhaust ventilation. Consider work permit system e.g. for maintenance activities.</li> </ul>	
land protection	: Wear working gloves when handling gas containers.	
Eye protection	: Wear safety glasses with side shields. Wear goggles and a face shield when transfilling or breaking transfer connections.	
Respiratory protection	: Self contained breathing apparatus (SCBA) or positive pressure airline with mask are to be used in oxygen-deficient atmospheres.	
Thermal hazard protection	: Wear cold insulating gloves. Wear cold insulating gloves when transfilling or breaking transfer	

: Wear safety shoes while handling containers.

Environmental exposure controls Other information

### SECTION 9: Physical and chemical properties

9.1. Information on basic physical and	chemical properties
Physical state	: Gas
Appearance	: Colorless liquid.
Molecular mass	: 28 g/mol
Color	: Colorless liquid.
Odor	: No odor warning properties.
Odor threshold	: No data available
pH	: Not applicable.
Relative evaporation rate (butyl acetate=1)	: No data available
Relative evaporation rate (ether=1)	: Not applicable.
Melting point	: -210 °C
Freezing point	: No data available
Boiling point	: -195.8 °C
Flash point	: No data available
Critical temperature	: -149.9 °C

EN (English US)

## Nitrogen, refrigerated liquid

Safety Data Sheet P-4630

Date of issue: 01/01/1979

This SDS conforms to U.S. Code of Federal Regulations 29 CFR 1910.1200, Hazard Communication.

Revision date: 10/21/2016 Supersedes: 10/03/2014

Auto-ignition temperature	: Not applicable.
Decomposition temperature	: No data available
Flammability (solid, gas)	: No data available
Vapor pressure	: Not applicable.
Critical pressure	: 3390 kPa
Relative vapor density at 20 °C	: No data available
Relative density	: 0.8
Density	: 808.5 kg/m <sup>3</sup> Liquid density at boiling point and 1 atm
Relative gas density	: 0.97
Solubility	: Water: 20 mg/l
Log Pow	: Not applicable.
Log Kow	: Not applicable.
Viscosity, kinematic	: Not applicable.
Viscosity, dynamic	: Not applicable.
Explosive properties	: Not applicable.
Oxidizing properties	: None.
Explosion limits	: No data available
9.2. Other information	
Gas group	: Refrigerated liquefied gas
Additional information	: Gas/vapor heavier than air. May accumulate in confined spaces, particularly at or below ground level

SECT	ION 10: Stability and reactivity	
10.1.	Reactivity	
		No reactivity hazard other than the effects described in sub-sections below.
10.2.	Chemical stability	
		Stable under normal conditions.
10.3.	Possibility of hazardous reactions	
		None.
10.4.	Conditions to avoid	
		Avoid high temperatures, exposure to Lithium (Li), Neodymium (Nd), Titanium (Ti), Magnesium.
10.5.	Incompatible materials	
		None.
10.6.	Hazardous decomposition products	
		Under certain conditions, nitrogen can react violently with lithium, neodymium, titanium (above 1472°F/800°C), and magnesium to form nitrides. At high temperature, it can also combine with oxygen and hydrogen.
SECT	ION 11: Toxicological informatic	on de la constante de la const
11.1.	Information on toxicological effects	
Acute to	oxicity	: Not classified
Skin corr	osion/irritation :	Not classified

Skill corrosion/initiation	
	pH: Not applicable.
Serious eye damage/irritation	: Not classified
	pH: Not applicable.
Respiratory or skin sensitization	: Not classified
Germ cell mutagenicity	: Not classified
Carcinogenicity	: Not classified

Reproductive toxicity	: Not classified
Specific target organ toxicity (single exposure)	: Not classified
Specific target organ toxicity (repeated exposure)	: Not classified
Aspiration hazard	: Not classified
SECTION 12: Ecological information	2
SECTION 12. ECOlogical information	
12.1. Toxicity	

Ecology - general

: No ecological damage caused by this product.

12.2. Persistence and degradability		
Nitrogen, refrigerated liquid (7727-37-	9)	
Persistence and degradability No ecological damage caused by this product.		
2.3. Bioaccumulative potential		
Nitrogen, refrigerated liquid (7727-37-	9)	
Log Pow	Not applicable.	
Log Kow	Not applicable.	
Bioaccumulative potential	No ecological damage caused by this product.	
12.4. Mobility in soil		
Nitrogen, refrigerated liquid (7727-37-	9)	
Mobility in soil	No data available.	
Ecology - soil	No ecological damage caused by this product.	
12.5. Other adverse effects		
Dille an a du cana a affa ata	· Con acuse fract demonstration	

Other adverse effects	: Can cause frost damage to vegetation.
Effect on ozone layer	: None
Effect on the global warming	: No known effects from this product

# SECTION 13: Disposal considerations 13.1. Waste treatment methods Waste disposal recommendations : Dispose of contents/container in accordance with local/regional/national/international regulations. Contact supplier for any special requirements.

<b>SECTION 14: Transport informati</b>	ion
In accordance with DOT	
Transport document description	: UN1977 Nitrogen, refrigerated liquid (cryogenic liquid), 2.2
UN-No.(DOT)	: UN1977
Proper Shipping Name (DOT)	: Nitrogen, refrigerated liquid cryogenic liquid
Class (DOT)	: 2.2 - Class 2.2 - Non-flammable compressed gas 49 CFR 173.115
Hazard labels (DOT)	: 2.2 - Non-flammable gas

SDS ID: P-4630

## XTRACTOR Nitrogen, refrigerated liquid Safety Data Sheet P-4630

This SI	IV Data Sheet P-4630           DS conforms to U.S. Code of Federal Regulations 29 CFR 1910.1200, Hazard Communication.           issue: 01/01/1979         Revision date: 10/21/2016         Supersedes: 10/03/2014
DOT Special Provisions (49 CFR 172.102)	<ul> <li>345 - "Nitrogen, refrigerated liquid (cryogenic liquid), UN1977" transported in open cryogenic receptacles with a maximum capacity of 1 L are not subject to the requirements of this subchapter. The receptacles must be constructed with glass double walls having the space between the walls vacuum insulated and each receptacle must be transported in an outer packaging with sufficient cushioning and absorbent materials to protect the receptacle from damage</li> <li>346 - "Nitrogen, refrigerated liquid (cryogenic liquid), UN1977" transported in accordance with the requirements for open cryogenic receptacles in §173.320 and this special provision are not subject to any other requirements of this subchapter. The receptacle must contain no hazardous materials other than the liquid nitrogen which must be fully absorbed in a porous material in the receptacle</li> <li>T75 - When portable tank instruction T75 is referenced in Column (7) of the 172.101 Table, the applicable refrigerated liquefied gases are authorized to be transported in portable tanks in accordance with the requirements of 178.277 of this subchapter</li> <li>TP5 - For a portable tank used for the transport of flammable refrigerated liquefied gases or refrigerated liquefied oxygen, the maximum rate at which the portable tank may be filled must not exceed the liquid flow capacity of the primary pressure relief system rated at a pressure not exceed the liquid flow capacity of the primary pressure. For portable tanks used for the transport of refrigerated liquefied at a pressure. For portable tank suge of rthe portable tank's design pressure. For portable tanks used for the transport of refrigerated liquefied helium and refrigerated liquefied atmospheric gas (except oxygen), the maximum rate at which the tank is filled must not exceed the liquid flow capacity of the primary pressure relief device or pressure. Except for a portable tank containing refrigerated liquefied helium, a portable tank shall have an outage of at least two percen</li></ul>
Additional information	
Emergency Response Guide (ERG) Number	: 121 (UN1066);120 (UN1977)
Other information	: No supplementary information available.
Special transport precautions	<ul> <li>Avoid transport on vehicles where the load space is not separated from the driver's compartment. Ensure vehicle driver is aware of the potential hazards of the load and knows what to do in the event of an accident or an emergency. Before transporting product containers:</li> <li>Ensure there is adequate ventilation Ensure that containers are firmly secured Ensure cylinder valve is closed and not leaking Ensure valve outlet cap nut or plug (where provided) is correctly fitted.</li> </ul>
<b>Transport by sea</b> UN-No. (IMDG) Proper Shipping Name (IMDG) Class (IMDG) MFAG-No	<ul> <li>1977</li> <li>NITROGEN, REFRIGERATED LIQUID</li> <li>2.2 - Non-flammable, non-toxic gases</li> <li>120</li> </ul>
Air transport UN-No. (IATA) Proper Shipping Name (IATA) Class (IATA) Civil Aeronautics Law	<ul> <li>1977</li> <li>NITROGEN, REFRIGERATED LIQUID</li> <li>2</li> <li>Gases under pressure/Gases nonflammable nontoxic under pressure</li> </ul>

SECTION 15: Regulatory information	n
15.1. US Federal regulations	
Nitrogen, refrigerated liquid (7727-37-9)	
Listed on the United States TSCA (Toxic Subs	tances Control Act) inventory
SARA Section 311/312 Hazard Classes	Immediate (acute) health hazard Sudden release of pressure hazard
	All components of this product are listed on the Toxic Substances Control Act (TSCA) inventory.

EN (English US)
