Tools & Hardware

Laptop Mount (1)

Hex Key (1)

Mounting Screw (1)

Preparation

STEP 1: Slip the laptop mount into the slot of the silver mounting lug on the left side of the monitor arm.

**STEP 2:** Once the laptop mount is in place insert the screw.

STEP 3: Use the hex key to tighten the screw. Wiggle the laptop mount back and forth as you do this to make sure it is tight. Even when the screw is tight, the mount will still move a little in the lug.

The new way to work

Insert Laptop

STEP 4: Pull on the left side (spring loaded) sliding arm, and insert the laptop screen between the plastic keepers on the end brackets

STEP 5: Once the laptop is secure, gently release the bar clamp so it is against the side of the laptop screen, then adjust the laptop screen to the desired angle. Make sure that there is enough clearance between the laptop and any wall or other object that that the laptop may come in contact with at any point of the Altwork stations full range of motion to avoid damage to the laptop or the station.
