our guarantee

We guarantee that our furniture will have gaps and cracks, but will not fall apart for as long as you own it!

Shipping charges for replacement parts are included during your first year of ownership.

Foam, fabric and mechanisms (non-wood parts) are guaranteed against faulty workmanship for a period of one year from the date of delivery. As most mills do not guarantee their fabric we will not be held responsible for wear or fading of our products’ fabric.

This guarantee is limited to the original purchaser & also limited to furniture used indoors under normal residential conditions only. Your invoice is your proof of purchase. See your retailer for further details & commercial warranty terms.

our furniture

CD Furniture carries on a tradition of producing quality Canadian furniture at our factory since 1906!

CD Furniture has clean, simple lines that never go out of style, with a solid, hand-crafted look and feel. Sizes are designed to make it easy for you to maximize your space.

Our quality construction begins with the finest kiln-dried Southern Yellow Pine. Quality control checks are made at each step of the manufacturing process and every piece gets a final inspection before shipment.

Veneered panels are used on doors and most tops, for easier cleaning and greater stability.

All furniture parts are available from the factory in case of loss or damage. This is furniture you never throw out!

ordering your furniture

Sizes

Measure your space to help you find the right size of furniture. We provide dimensions for our furniture, in inches and measured at the largest points (measurements are approximate).

Can’t find the right size?

CD Furniture can customize most measurements to suit your needs.

Finish

Choose the finish to suit your décor. Our Classic finish is a durable penetrating oil made to be forgiving and easy to care for. Premium finishes offer the latest designer colours with a touch of sheen. Lacquer can be added to the top only of select models for extra protection. Or your CD Furniture can be ordered unfinished for you to personalize it.

Fabric

CD Furniture offers you a variety of fabrics to complete your upholstered models to meet your needs and coordinate with your décor. Visit cratedesignsfurniture.com/fabric-choices to view the full fabric selection.

Mattresses

Don’t forget about the mattress for your new bed. CD Furniture manufactures quality mattresses to fit every bed. See details on the back cover.

Locations

Find your nearest retailer at cratedesignsfurniture.com/storelocator/

All sizes (shown in inches) in this catalogue are approximate and are measured at the widest point. All beds in the catalogue are shown with Premier mattresses only (priced separately on the back cover).

Foundations are not required on CD beds or bunk beds.

Manufacturer’s suggested retail pricing is shown for Classic and Unfinished furniture. Add 10% for premium finishes. Prices for items that include fabric are shown in grade A and may increase depending on your choice.

our environment

We take our environmental responsibilities seriously, which is why:

We only use plantation grown and harvested wood. Southern Yellow Pine forests are some of the most productive and sustainable timberlands in the world and it is an abundant and renewable resource.

The furniture is blanket wrapped for shipping whenever possible instead of using disposable packaging.

Waste generated is recycled where possible (wood chips and sawdust for animal bedding, wood scraps for fuel) and when not feasible is disposed of in a responsible manner.

Quality and durability mean a very long product lifecycle (lifetime!) which minimizes the impact and footprint of your purchase on the environment.

Moreover we offer a residential style so both caregivers and residents feel at home.

Clients include many prestigious private boarding schools, public schools, colleges and universities, camps, residential and daycare centres for children and adults with learning difficulties, children’s homes, respite care, detox/rehab facilities and any continuous use environment you can imagine.
