My Academic Vocabulary Journal

6 Step Academic Vocabulary Organizer Explained

Students identify academic term.

Activity 2

Students begin thinking and referencing prior knowledge related to this concept.

EXPLAIN REASONING

Activity 4

Students refine their understanding by identifying opposing definitions or ideas.

ENGAGE WITH CONTENT

Word
common denominator

Subject: Math Date: 2/9/17

What I heard:

A denominator of 2 or more fractions must be equal to perform addition, subtraction, or to compare fractions.

What I think the word means:

Same number on bottom to plus or minus fractions.

What I think the opposite/non-example of the word is:

different denominators

NOT $\frac{5}{13} + \frac{6}{15} = \frac{11}{15}$

What characteristics of the word did I learn from my discussion:

In order to add or subtract fractions, you must have common denominators.

A sentence describing what I learned after the group activity/game using this word:

if denominators are not the same, we could make them common denominators by multiplying.

Activity 1

Students write textbook or teacher explanation of the term.

Activity 3

Students develop a graphic representation of the concept.

Activity 5

Promotes academic language discussion, and helps students to verbalize before they write.

INITIATE ACADEMIC DISCUSSION

Self Assessment:

I can define the word in English and use it correctly.	<input checked="" type="checkbox"/>
I can use the word but can NOT define it in English.	<input type="checkbox"/>
I know the word in English but can NOT use the word.	<input type="checkbox"/>
I'm still confused! HELP!	<input type="checkbox"/>

Activity 6

Engages students in interactive demonstration of understanding.

ASSESS UNDERSTANDING

Allows students to self-evaluate and help teachers know if the issue is language or content.
