

100 LITRE MEGA VIVI-SLIME XTREME

Note: You will require an electric hand-held mixing device such as a paint mixer / drill attachment to mix this gunge.

Mixing Instructions:

1. Empty the 'Activator' into a small bowl or jug. Add 2500ml of very warm, but not boiling water.

Stir with a spoon to spread the particles and set aside to dissolve.

2. Begin the mixing device. Slowly sprinkle the powder into the 100 litres (20 gallons) of warm water. Keep mixing ensuring all the powder has been consumed. The water will gradually thicken to gunge.

Move the mixer about, ensuring the powder doesn't congregate or form lumps.

3. Pour a small amount (150-200ml) of 'Activator liquid' into the gunge. Ideally using your hands, mix/stir to combine the activator with the gunge. This process will take about 5 minutes.

Do not rush to add more activator! As the mixture combines, it bonds, stretching the gunge. Be patient.

Handy Tips & Advice:

VIVI-slime Xtreme may clump when added to water, here are a couple of tips to help with your mixing.

- Try sieving the powder into the water, while agitating with an electric mixer.
- Mix the powder with a little food oil until a slurry has formed. This is then easily poured into the water.
- **The Activator contains Borax. Handle with care. Not edible. Do not consume.**

Cleaning of Clothes, Hair & Skin:

Before washing your clothing, remove any excess gunge. Gunge naturally dilutes in water, so the quickest and easiest way to do this is in the shower while cleaning off. Using our **Easy Mess Removers** clean off is effortless! Just wash as usual!

To prevent staining, wash clothing shortly after use. Do not let the clothing dry before washing as this could cause the clothes to stain.

Floor & Surface Protection:

We recommend you protect your environment by laying tarpaulin, dust sheets or towels. Some surfaces will become slippery during and after use, so anti-slip matting is also advised.

If spillages do occur, remove the excess liquid and carefully rinse with warm soapy water and any, if needed, household stain remover.

Disposal:

VIVI-slime is naturally biodegradable and environmentally friendly. Disposal is quick and easy. Dilute with plenty of water and pour down the drain/toilet.

To prevent temporary blockages, be sure to use plenty of water when diluting.

Safety:

Safety checks before use is advised to ensure all hard objects, exposed electrical points and any potential hazards have been secured. Always supervise children. If irritation occurs, rinse with warm water.
