

## How to Make 1 Litre of UV GungeGLO™

### **Mixing Instructions:**

The UV GungeGLO powder reacts very quickly to water; speed is vital once the powder and water combine. To prevent lumps forming, we recommend using an electric hand mixer.

1. Fill a container with 1 litre of lukewarm water and start the mixer, creating a whirlpool effect.
2. Quickly pour the powder into the whirlpool which will encourage the powder to sufficiently disperse and prevent lumps forming
3. You'll see the water quickly thicken. Move the mixer around to stir the solution.

*If the gunge is too thick, add a little warm water and stir briskly to thin down the gunge.*

---

### **Handy Tips & Advice:**

- Use lukewarm, not hot water. This allows a little extra time to stir and combine the powder with water.
  - It's best to use an electric mixer as this will breakdown any lumps that form.
  - If small lumps do form, either remove using a sieve or spoon and place in the bin. Or, using an electric hand mixer, whizz the gunge until the lumps have separated.
- 

### **Cleaning Clothes, Hair & Skin:**

Before washing your clothing, remove any excess gunge. Gunge naturally dilutes in water, so the quickest and easiest way to do this is in the shower while cleaning off. Using our **Easy Mess Removers** clean off is effortless! Just wash as usual!

To prevent staining, wash clothing shortly after use. Do not let the clothing dry before washing as this could cause the clothes to stain.

### **Floor & Surface Protection:**

We recommend you protect your environment by laying tarpaulin, dust sheets or towels. Some surfaces will become slippery during and after use, so anti-slip matting is also advised.

If spillages do occur, remove the excess liquid, and carefully rinse with warm soapy water and any, if needed, household stain remover.

---

### **Disposal:**

UV GungeGLO is naturally biodegradable and environmentally friendly. Disposal is quick and easy. Dilute with plenty of water and pour down the drain/toilet.

To prevent temporary blockages, be sure to use plenty of water when diluting.

---

### **Safety:**

Safety checks before use is advised to ensure all hard objects, exposed electrical points and any potential hazards have been secured. Always supervise children. If irritation occurs, rinse with warm water.
