Ms. Oram,

We have completed our review of the above-mentioned product. Based on the information that the Canadian Food Inspection Agency (CFIA) has reviewed, we have determined that this product meets all requirements as outlined in the *Fertilizers Act* and regulations and may be legally sold in Canada. Therefore, the above product has been granted re-registration under the *Fertilizers Act* until **June 24, 2024**. All labels associated with this product found in the marketplace must contain the registration number stated above.

Enclosed with this letter you will find a copy of the approved label. The signed registration form will be sent by regular mail. Please ensure that the actual product labels found in the Canadian marketplace are the same as the enclosed label. Please be advised that the presence of the CFIA stamp, on the final label is only as a symbol of approval and the reproduction or use of the CFIA stamp on labels in the marketplace is prohibited and subject to enforcement if found in the marketplace. Please note that all products are required to bear a lot/batch number on the product label. As well, please ensure that all advertising claims regarding the benefits of this product are limited to those identified on the approved label.

Effective October 26, 2020, the CFIA has updated the *Fertilizers Regulations* to reduce red tape and provide more flexibility to industry while focusing on product safety and environmental protection. This product registration will cease to be valid on October 25, 2023. As this product is exempt from registration under the modernized *Fertilizers Regulations* you will need to prepare new labels that are compliant with the modernized regulations to continue to market your product beyond that date. Please consult the CFIA's [Fertilizer web page](#) to familiarize yourself with the requirements of the modernized regulations so that you are prepared to transition. Product found in the marketplace after October 25, 2023 that is labelled in compliance with the former regulations will be non-compliant and may be subject to enforcement action.

Please note that as new regulations and/or policies are developed, the acceptability of this product under the *Fertilizers Act* and regulations may also change. It is the responsibility of the manufacturer/registrant/distributor/retailer to ensure that the product and the label continue to meet the requirements for sale in Canada, as outlined in the *Fertilizers Act* and regulations.

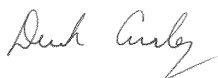

Please note that an amendment to your registration must be submitted to the CFIA and approved prior to making any changes to the label, chemical composition, or constituent materials of the product (if the change could reasonably be expected to affect its performance as a fertilizer or supplement, its safety or its use).

The CFIA will accept submissions for renewal up to six months prior to expiration if there are no changes to the constituent materials or manufacturing process from the previous registration, and up to one year in advance if there are changes to the constituent materials or manufacturing process. The registrant must ensure that they are aware of the date that the product expires (found on registration certificate), and to submit their renewal application on, or before, the stated expiry date. The CFIA will not send you a reminder.

Should you require assistance to submit a re-registration, please contact the Pre-market Application Submissions Office (PASO) by telephone at: 1-855-212-7695, by e-mail at: [cfia.paso-bpdpm.acia@canada.ca](mailto:cfia.paso-bpdpm.acia@canada.ca) (ensure the word "fertilizer" is in the subject line) or visit our website at the following: <http://www.inspection.gc.ca/english/plaveg/fereng/ferenge.shtml>

Please contact me should you have any questions regarding this registration letter.

Sincerely,

Derek Curley  
Senior Evaluator
