EVERYONE DESERVES A GOOD NIGHT'S REST

From firm to soft - get optimum spinal support without compromising on quality of sleep. Enhance your quality of sleep with German engineering, because why not? Sleep is wunderbar.

WHY SCANKOMFORT?

1. Quality Assurance

Our collections feature premium quality mattresses made in Germany.

When was the last time you washed your mattress?

2. Cover/ Fabric

Removable, washable covers - For greater peace of mind, our Germany-made mattresses come with washable covers that are dryer safe and easy to maintain.

Climate-regulating fibre - Helps to maintain a comfortable temperature which improves quality of sleep.

3. Padding

Natural Latex - The elasticity of latex allows the mattress to conform pleasantly to the user's body shape. Latex has an open-cell natural structure to allow excellent air circulation and breathability. This helps to regulate and maintain a comfortable temperature for sleeping.

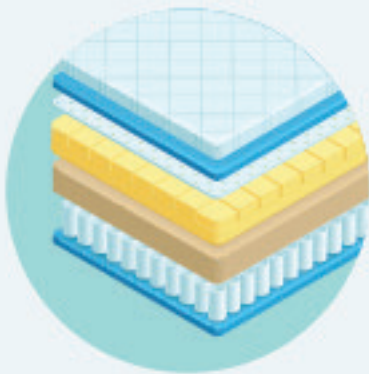

Cold foam padding - Durable, highly elastic and hygienic; Ideal for following the body's contours while providing comfort and support.

High quality visco elastic memory foam with density rating $\geq 80\text{kg}$ - For soft support without causing discomfort, Visco memory foam conforms to the body's contours while providing support.

4. Foam Encasement

High density foam - Improves sleep quality.

Foam box encasement - A thick foam border that reduces likelihood of sagging mattresses and/or mattress border breakdown.

5. Zone Support

3 - 7 zone support system - Dampen vibration to reduce interference to your partner. Larger area of zoning to provide greater support for all parts of your body (head, neck, shoulder, back, hip, legs and feet). For undisturbed sleep.

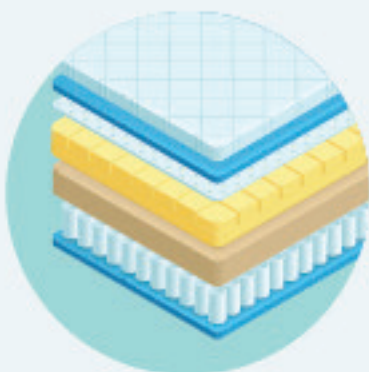

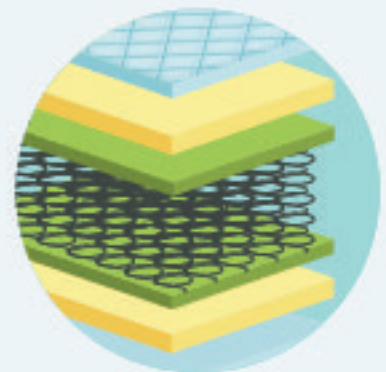

6. Spring

Keeping it tight!

Spring Stacking tech - With up to 1400 coils, our mattresses offers greater stability, durability and of course, support for your back.

Bonnell spring - Lightweight made from heat-tempered high carbon steel wire (2.4mm)

Pocketed springs/ coils - ensures each spring lasts longer; reduces transfer of movement for undisturbed sleep (good for people who share beds).

7. Sleep Research

Extensive research done by frankenstolz Akademie der Ingenieure, an academy that consists of a union of experts with the goal to optimize sleeping comfort.

One of the involved companies is f.a.n frankenstolz Schlafkomfort, one of the leading manufacturer of bedding and mattresses with over 60 years of history.
