

# Love Bracelet Size Guide

## How to use the Love bracelet sizing guide:

Before printing out the wrist sizer, make sure that you are printing onto a standard 8.5 by 11 page, with “page scaling” set to “none” and the PDF set at 100%. To confirm the accuracy of the sizer, use a ruler to see if the two-inch sample is set to scale, if it is not then the sizing will be off.

## Find your Love bracelet size in 6 simple steps:

1. Cut out the wrist sizer.
2. Cut out a small line in the wrist sizer where it says, “cut here.”
3. Place the pointed end of the wrist sizer into the cut you made at the opposite end.
4. Gently tighten the sizer until it comfortably fits around your wrist but is not so tight that it presses into your skin.
5. The number that the arrow points to is your wrist size. If you have a half size, such as 15.5cm, round up to 16cm.
6. Depending on how you want your Love bracelet to fit, add 1cm for a tight fit and 2cm for a looser fit.
