

LEROUGE 135 & 135L Pinhole cameras

1-Open the take up canister and fasten the fresh film onto the spool using thin tape.

2-Open the camera unscewing the central knob.

3-Place the canisters as shown on photo.

4 & 5-Close the camera as shown on photos then make 2 turns or so to go to the first frame.

6-To take a photo open the shutter the time required.

7-To go to the next frame make 1 turn with the advancing knob (135) or 1.5 turn (135L panoramic)

Repeat 6-7 until the end of the film then open the camera, inverse the position of the 2 canisters, close the camera & rewind the exposed film in its original canister. Finally recover the exposed film.
