

18KARAT

TABLE FRAMES

18KARAT's table frames are designed to be effortlessly modern. The simple designs are surprisingly strong and are the perfect accent to the natural beauty of our marble table tops. All table frames are made of brushed stainless steel.

ASSEMBLY

Some frames require simple numbered assembly. Slot together parts with matching numbers and screw pieces together using included hardware and tools. Assembled frames can be adjusted using levellers at bottom of feet. Screw or unscrew levellers to raise or lower legs. Foam pads can be affixed to the top of the frame to cushion and level marble table tops.

CLEANING

Stainless steel can be cleaned with a stainless steel cleaner and a soft, clean cloth. Do not use abrasive cleansers.

WARRANTIES

Frames are warranted for one year, under normal residential use. Warranty will not extend to any piece that is not stored or moved with adequate care and equipment.
