## FOLLOW YOUR INTUITION

Nautilus One equipment combines revolutionary weight stack technology and the most intuitive and user-friendly selection method ever created: a dial. Our unique 4-bar linkage and specialized cam design provides smooth resistance and proper muscle loading through the complete range of motion, while fewer guide rods, cams and pulleys extend the life of this product well past other machines. For a unique, safe and effective strength training experience, there is only ONE choice that will ensure your facility stands out from your competition.

### UNIQUE WEIGHT SELECTION DIAL

Now weight selection is as easy as turning a dial. The unique weight selection dial is easily recognizable and always within reach from the seated position - no more bending down, reaching behind or standing up to adjust weight selection. Nautilus One® has no guide rods and no weight stack pins, which means less maintenance and downtime.

### INNOVATIVE AND UNIFIED TOWERS

Genius in its simplicity, the Nautilus One line features compact unified towers, each with patented weight stack technology and the unique weight selection dial. Plates are stacked side-by-side with minimal use of pulleys and belts to allow for natural movement mechanics that give a smooth, plate-loaded workout feel from a selectorized machine.
