

The Purpose of the seatbelt assembly is to help keep user's body in a proper position on the T4r seat while Nusteping.

- 1 Pull out lap belt from the retractor and clip it into the buckle assembly, as shown.
- 2 Pull adjuster loop on lap belt to take up slack as necessary, as shown. Grasp the Belt on the Retractor side and pull to confirm locking
- 3 To release, Press Red Bottom on Buckle and allow lap belt to retract back into the retractor assembly,

Retractor being clipped into Buckle
