

NOSY PEPPER

Embroidery

Make up wipe tutorial

Materials Needed:

- (2) Pieces of 5" x 5" flannel, cotton, chenille, fleece or terry cloth material (4" x 4" for the 3" x 3" wipes)
- Medium weight tear away or heavy weight water soluble stabilizer (hooped)
- Scissors

Material Right Side

Material Wrong Side

Stabilizer

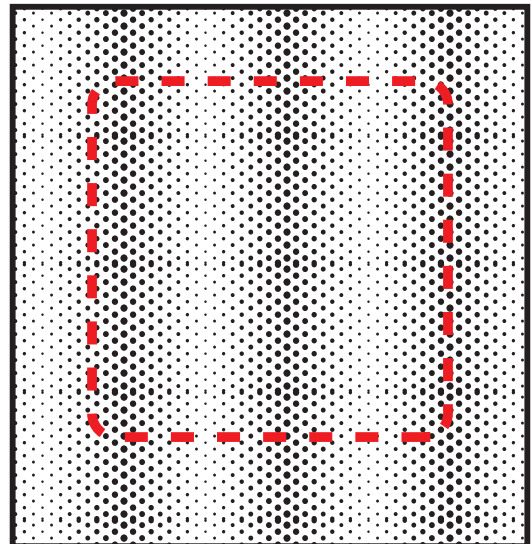

Please note:

ALL steps and ALL materials are placed on the RIGHT side of your hoop for this project

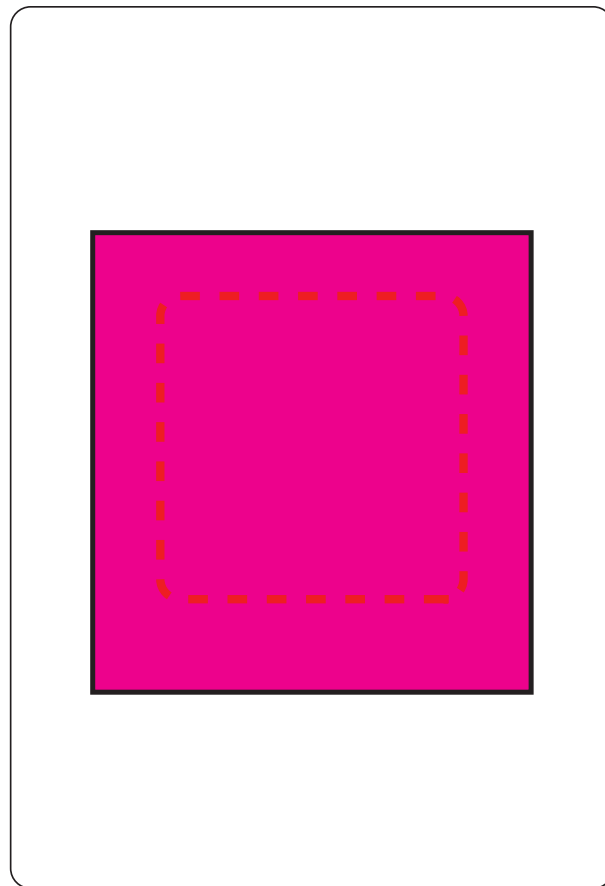

1) Hoop stabilizer and run the first step to stitch out the placement for materials.

2) Place your backing fabric WRONG side up directly over the placement stitching. The RIGHT side of your material will be against the stabilizer. Run the next step to tack down the backing.

3) Place the other piece of material RIGHT side up on the hoop, directly over the backing fabric. The WRONG sides of the materials should be touching. Run the next step to tack down the front fabric.

4) Run the next step to add quilting to the wipe. This will keep the layers together during real use.

5) Remove hoop from machine but do NOT un-hoop materials. Carefully trim around all sides, as close to the stitching as possible without cutting into the stitches. Use care to NOT cut into Stabilizer.

*Tip: if you are struggling with one layer of Stabilizer while you are cutting, you may use 2 layers of stabilizer in your hoop**

6) Run the last step to stitch the satin around all edges of the wipe.

That's it! You have finished the wipe!

Please share your makes in our [Facebook Group](#) or use the hashtag #NosyPepperEmbroidery on Instagram so we can all see your makes!
