BEAM ANGLE

At just over 1/4 in. thick and 3-3/4 in. diameter, the Armacost Wafer Thin LED Puck Light is brilliantly designed and engineered to offer true color consistency and perfect light uniformity in a discreet and ultra thin light fixture. Wafer lights can be used in a wide range of applications including under cabinet where they produce little or no unwanted reflection on dark gloss counter tops. Fully dimmable and compatible with other Armacost Lighting LED products and accessories.
