Vapor proof led light is with the design of steel cage, which makes the light more safer. With IP65, it can be applied to both dry and wet location. Metal wire pipe design use better protective wire rod, junction box, adopt traditional connection way with multi-direction for concatenation wire. The 90-180 adjustable angle enables it to fit for more applications, such as vertical installation and horizontal installation. This light fixture has advantages of wide lighting angles, high efficiency, no flickering, and long lifespan.
## IMPORTANT SAFETY NOTICES:

When using electrical equipment, basic safety precautions should always be followed
WARNING:Operating temperature: -4° F to 113°F.
WARNING:They are suitable for dry and wet locations.
WARNING:This device can not be intended for use with emergency exits.
WARNING:Turn off the power before installation.
WARNING:The electrical rating of this product is 100-277V.
Installer must confirm that there is 100-277V at the fixture before installation.

| What's in the box | | | |
|---|---|---|---|
| Screw: PM5*13 | 1 pc | Expansion screws | 3 pcs |
| Screw: PA5*40 | 3 pcs | Bend Pipe | 1 pc |

**CCT Selectable: 3000K/4000K/5000K**
**Watt Selectable: 15W/20W/30W**

## THE FIRST INSTALL METHOD

**STEP:1**

Drill two holes and install the lamp base

**STEP:2**

Insert the wire pipe

**STEP:3**

Connect the cable

**STEP:4**

# THE SECOND INSTALL METHOD

### STEP:1

First the wire is threaded
through the round hole in the base

When installed on the outdoor side wall,
the inside bend pipe of this part can prevent
water flow in from the wall seam

### STEP:2

① Tighten the bottom hole mounting
and aim it with the upper hole

② Screw the base
### STEP:3

Connect the wire

GND    N    L

### STEP:4

Tighten the screws

# DIFFERENT INSTALLATION ORIENTATIONS

Mode 1            Mode 2            Mode 3            Mode 4

# BASIC PARAMETERS:

| Watt | Input | Light effect | Lamp Dimension (180°) | Lamp Dimension (90°) | Operating temperature |
