Installation Instruction
UFO High Bay

This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

To prevent death, injury or damage to property, this product must be installed in accordance to National Electrical Code (NFPA70) in the US or Canadian Electrical Code (C3A 22.1) in Canada.

Risk of fire or electric shock. The electrical rating of these products are 100-277 Vac, the installer must determine whether they have 100-277 Vac at the luminaire before installation.

Risk of fire or electric shock. LED Commercial High Bay installation requires knowledge of luminaires electrical systems. If not qualified, do not attempt installation. Contact a qualified electrician.

To prevent wiring damage or abrasion, do not expose wiring to edges of sheet metal or other sharp objects.

Disconnect power before installing the product or servicing it.

Wait until fixture has cooled down before installing or servicing the fixture.

MIN. 90°C SUPPLY CONDUCTORS

What's In The Box

One (1) LED High Bay

Optional Accessories

- Aluminum Reflector
- Plastic Reflector
- Sensor (Brackets, Screws, Metal plates)
- Junction Box (Bracket, Screws)

Tools Needed

This LED High Bay requires very few tools for installation. A screwdriver and a pair of wirecutters will help to install the reflector and fasten the mounting hook.

Installing Reflectors

If reflector is not available, please move to Step 3.

a Plastic Reflector:

1. Plastic Reflector: Remove (3) protruding screws on LED High Bay.
2. Place reflector ring within plastic reflector. Align holes on ring and plastic reflector with fixture and fasten screws back into fixture.

b Aluminum Reflector:

1. Aluminum Reflector: Loosen (3) protruding screws on LED High Bay. Place aluminum reflector over protruding screws and twist to lock. Ensure reflector is secure and then fasten protruding screws.
**Installing Sensor**  
If sensor is not available, please move to Step 3.

2. Fix the bracket with junction box to the heat sink, please note the positioning of vertical-view image. If the suggested positioning is not suitable for your application, adjustment is allowed to maintain balance.

---

**Installing LED High Bay**

3. Carefully unpack the fixture from its packaging. Inspect product for defects due to shipping.

4. Turn off power to appropriate circuit at the breaker panel.

5. Locate stable structure to hang fixture.

6. Mount fixture to stable structure. Ensure fixture is within a reasonable distance of junction box for wiring. Fasten screw on mounting hook to ensure safety.

7. Make all wiring connections. Cap off dimming wires if not used. LED High Bay is now installed.
