- High Quality Construction at Great Value Pricing
- Available in F° or C° with Temp. Range of 200°F–400°F
- One Year Limited Warranty with Spare Parts

OVERVIEW

One of the easiest additions to a user's transfer business is a hat and cap press. GO's Xpress AR (auto release) Cap Press is professional in its construction and use, and is the perfect complement for those seeking to expand their transfer business.

The Xpress Cap presses come in a variety of configurations for all of the applications required for heat transfers. The Xpress AR Cap Press fits most requirements for these applications and includes professional features such as timed auto release, temperature control, audible alarms and counts. With the ergonomic handle and pressure controls, the Xpress AR Cap Press offers capabilities found on far more expensive presses. Additionally the die casting of the platen ensures continued long-term stable use for years.

IDEAL APPLICATIONS

Application possibilities include dye sublimation transfers onto caps, cap brims and more.
