

A.S.A.P.[®]

All Surface Access Polishers

More Shine. Less Time.

A.S.A.P.[®] Polishers are a simple, two-step polishing system that provides a high luster and shine in as little as 30 seconds.

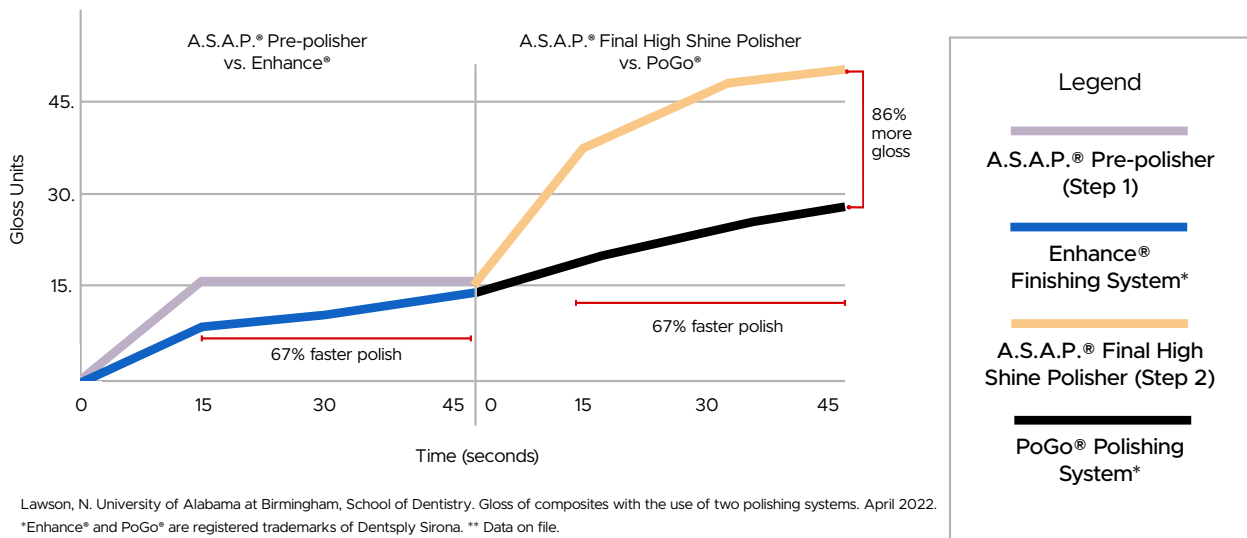

- **All Surface Access:** The spiral shape allows access to all surfaces of the restoration; simplifying the procedure and reducing the need to inventory multiple systems.
- **Fast, High Shine:** Both polishers in the A.S.A.P. system are diamond-impregnated to provide a 67% faster polishing time and an 86% higher gloss than a leading polishing system¹.
- **Durable:** A.S.A.P. Polishers can be autoclaved up to 30 cycles, making them remarkably durable and cost-effective*

*Placing excessive pressure on the polisher will lead to premature degradation. The polishers will also wear faster on harder indirect surfaces.

Proven Performance

A recent university-based study,** comparing the gloss produced by A.S.A.P. Polishers (Clinician's Choice[®]) and Enhance[®]/PoGo[®] (Dentsply Sirona) found that A.S.A.P. Polishers produced a higher gloss results, after 30 seconds, than Enhance and Pogo did after 90 seconds.

Maximum Gloss Per System
