## LOOKING FOR A WAY TO EASILY SWITCH TO KOMET BURS?

1. Match your bur's head size to one of the black dots representing a head diameter.
2. Then lay the bur on the grid with the head pointing towards that black dot. Make sure to place the bur parallel to the grid lines, as shown in the example.
3. Snap a picture using a smartphone or tablet, and send the image to: customerservice@clinicalresearchdental.com.

One of the CRD's rotary instrument specialists will expertly match the instrument and recommend the equivalent Komet diamond or carbide.

Need help with choosing the right Komet bur? Book a meeting

Use clear tape on the shanks to keep the burs from rolling off the grid as you take a photo
