

GROOVY DIAMOND POLISHING BRUSHES

Now you can get a super-gloss polish on hybrids and porcelain with just one brush... and keep your grooves!

As the name suggests, GROOVY Diamond® Polishing Brushes create an ultra-high shine by polishing the surface grooves and detailed anatomy that you spend valuable chair time creating. The GROOVY Diamond Polishing Brush technique is fast and efficient, and won't leave behind that flat surface that often occurs with disc finishing systems.

GROOVY outshines

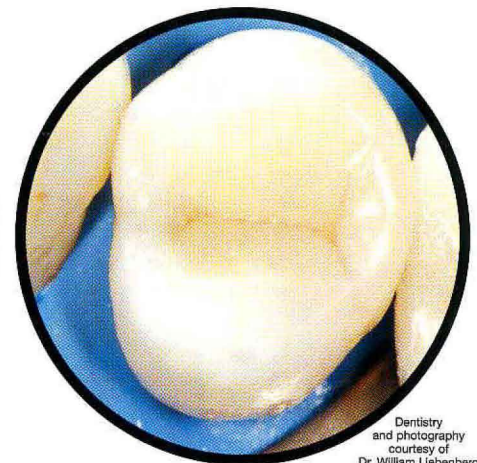

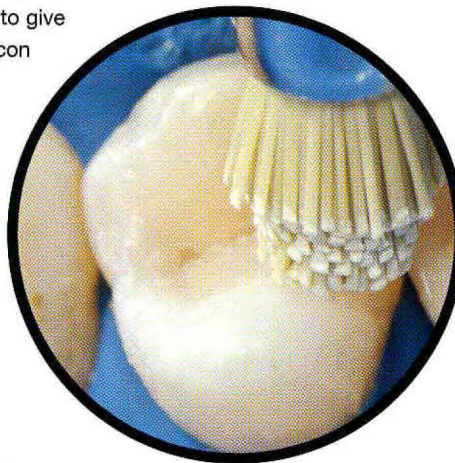

Only GROOVY Brushes are crafted from diamond impregnated Kevlar bristles with thousands of diamond polishing particles to give you the highest gloss finish possible (outshining all silicon carbide brushes), often in well under 30 seconds.

GROOVY works on hybrids and porcelain

Only GROOVY Brushes provide a super gloss shine on hybrids and porcelain, and bisacryl temporaries.

GROOVY outperforms

GROOVY Diamond Polishing Brushes won't lose their bristles like other polishing brushes, and can be autoclaved and re-used dozens of times.

SORRY, But If It Doesn't Say GROOVY On The Box...

While some other polishing brushes may look like our GROOVY Diamond Polishing Brushes, the fact is, they aren't made like them. So if you want to be safe, not sorry, make sure it's a GROOVY.

Refer to chart at right for more kit configurations.
