INSTRUCTIONS

1. Visit the website or Instagram to look at pictures, descriptions and order instructions.
2. Contact us with any questions you have prior to placing your order
3. Start your order by clicking on the "Shop" button and go through the prompts selecting pattern, borders, extras, etc.
4. Once your order is confirmed, you will be contacted within 24 hours and given a date on which your framework is scheduled. This helps minimize the time that you have to spend without your firearm.
5. Ship your frame with enough time so that it arrives on or before the day that your framework is scheduled to begin. Once you have shipped your frame, Text, DM or email me the tracking information. You should ship your frame with THIS order form that you will download from the website. Your order confirmation screen is NOT the work order.
6. DO NOT send your frame signature required. If you do- this may result in an increased turn around time as I cannot assure I will be available to receive and sign for your package when it is delivered.
7. Your frame will be finished and returned directly to the address on this form via Fedex's priority overnight shipping service and you will be emailed a completion notification with tracking details.

*For Simplicity, the extras section assumes a right-handed shooter. For example, a trigger finger index texture pad would be placed along the side of the frame where your right hand trigger finger would rest while high and off the trigger. The textured hidden thumb ledge is listed twice (on the website) for those who are ambidextrous or desire a symmetrical look and want it on both sides.

** Some modifications are frame specific and cannot or should not be completed on every frame. Please be sure that your frame accepts the requested modifications. If you are unsure, please reach out first to enquire.
