

COMMERCIAL EXOTIC DEER HARVESTING

Broken Arrow Ranch

Benefits To The Rancher From Commercial Deer Harvesting

- Population management for a sustainable habitat
- Receive income from surplus animals
- Selective, one-by-one method ensures the “right” animals are harvested
- No animal stress
- Alternative option to trapping

About Broken Arrow Ranch

What We Do: Since 1983 Broken Arrow Ranch has been commercially harvesting surplus exotic deer and antelope for venison from Texas ranches. We are a reliable and respected option for population management. The animals are processed and packaged for sale to fine dining restaurants and individual consumers throughout the United States.

What We Harvest: We pay based on carcass weights of animals harvested. Please contact us for the prevailing rates for the following species:

- Axis Deer
- Sika Deer
- Fallow Deer
- Blackbuck Antelope
- Elk / Red Deer
- Nilgai Antelope

How We Do It: A harvesting crew (shooter and skinner) travels to the ranch accompanied by a state meat inspector. We also tow a mobile processing facility to the ranch where the harvested animals are skinned and eviscerated under inspection. Animals are field-harvested with minimal stress by a long-distance head shot, typically from 50 to 200 yards. We use a noise suppressor on the rifle to minimize disturbance to other animals. The processed animals are weighed then hung in the mobile processing facility’s built-in cooler built for transport back to our Ingram plant.

What The Rancher Can Expect From Us: We will discuss arrangements with the rancher before coming to the property. We will harvest only those animals designated by the rancher or a representative. We will respect the property. We will harvest animals in a humane way and do as little as possible to disturb other animals on the property. We will gladly provide a list of references from ranches that we have been working with over the past years. Payment for the animals harvested will be made within 10 days from harvest.

What We Expect From The Rancher: We will need at least one person to assist in identifying animals to be harvested and help load animals during harvesting. We prefer to use a ranch truck, since deer will not be stressed by its sight. We will need to have availability of running water for our processing facility. Our expectation is to harvest a minimum of 10 animals per trip.
