## DESCRIPTION

Scheduled maintenance is a necessity for all standby generators. The Air Cooled Scheduled Maintenance kits offer all the components necessary to perform a complete maintenance on Generac air-cooled generators. Oil will need to be purchased separately based upon the recommendations listed. Maintenance is recommended at every 200 hours or 2 years. If running in a dusty environment, more frequent maintenance may be required. Maintenance intervals may differ per model. Refer to the generator owner's manual for more information.

## OIL RECOMMENDATIONS

- SAE 30 above 32° F (0° C)
- 10W-30 between 40° and -10° F (4° and -23° C)
- Synthetic 5W-30 for all temperature ranges
