

## *How to install artificial hedging:*

- 1. Order the desired square meters of hedge panels to fit your wall, fence, or structure.*
- 2. Connect panels (if needed, they can be easily cut down to size using a pair of scissors and then joined with cable ties). Some of the hedge foliage has a growth direction, so make sure the panels are all connected with the foliage growing upwards.*
- 3. Staple, tie, screw or adhere panels to fence or wall, making sure to securely attach them. It's that easy.*

### **HOW TO INSTALL ARTIFICIAL HEDGES ONTO A WALL** (You can use a hammer and nails for this task).

1. You can use a hammer and nails for this task.
  2. Make sure the wall is sound and the nails will hold fast.
  3. Connect the panels together. The hedge foliage has a growth direction, so make sure the panels are all connected with the foliage growing upwards.
  4. Cut the panels to the exact size required.
  5. Nail the hedge directly onto the fence by securing the plastic matting to the surface
- Note:** We would recommend that for each hedge panel (1m x 1m) you use 4 nails across the top and then 3 rows of 4 more nails to ensure secure attachment.

### **HOW TO INSTALL ARTIFICIAL HEDGES ONTO A TIMBER FENCE** (You can use a staple gun and staples or a hammer and nails).

1. Connect the panels together. The hedge foliage has a growth direction, so make sure the panels are all connected with the foliage growing upwards.
  2. Cut the panels to the exact size required/
  3. Staple the hedge directly onto the fence by securing the plastic matting to the surface
- Note:** We would recommend that for each hedge panel (1m x 1m) you staple 4 staples across the top and then 3 rows of 4 more staples to ensure secure attachment.

### **HOW TO INSTALL ARTIFICIAL HEDGES ONTO A MESH FENCE** ( You can use cable ties for this task).

1. Connect the panels together. The hedge foliage has a growth direction, so make sure the panels are all connected with the foliage growing upwards.
  2. Cut the panels to the exact size required/
  3. Cable tie the hedge directly onto the fence starting from the top
- Note:** We would recommend that for each hedge panel (1m x 1m) you tie 4 cable ties across the top and then 3 rows of 4 more cable ties to ensure secure attachment.

### **DO YOU HAVE ANOTHER SURFACE IN MIND?**

As a general suggestion, if you can get a cable tie through the gaps of the fence or wall then consider using cable ties as these are a non-invasive, easy, and DIY method to attach too.

If you have another kind of wall that you are looking to attach an artificial hedge to, please let us know and we will be able to advise you. Give us a call on 083 287 4590 or email info@leafandliving.co.za
