

PRINTABLE SIZING TEMPLATE A4

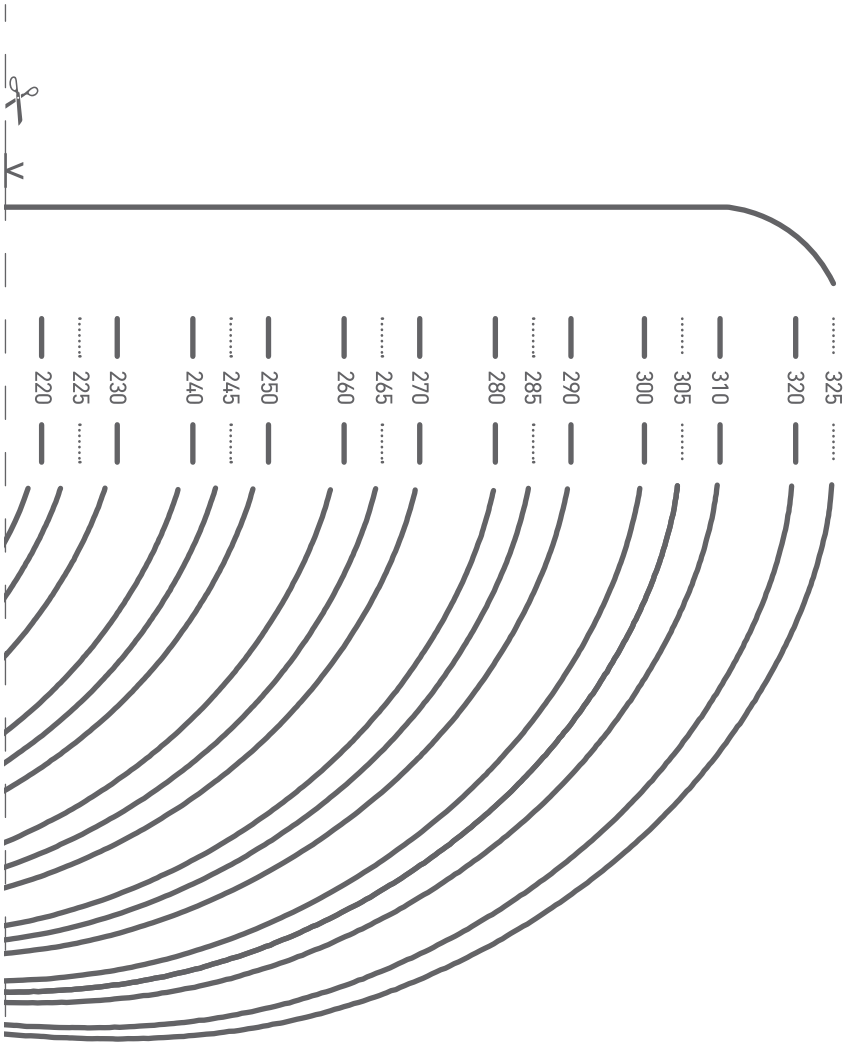

YOUR FIRST STEP INTO THE WORLD OF BIRKENSTOCK

MEASURING FEET CORRECTLY: The majority of BIRKENSTOCK models are available in two widths – regular and narrow. In order to determine which width is right for you, start by measuring the length of your feet. Place your right foot on the outline, ensuring that the heel and inside foot are level with the lines. You can now see the length from the millimeter scale. Now trace the outline of your right foot using a pencil. If the outline falls within the curve indicated, then we recommend a narrow model. If the outline falls outside the curve indicated, you need a model with regular width.

Prior to printing, ensure that Page Scaling is set to 100% on your print dialog box.

To make sure that the guide was printed in the correct format, simply measure the millimeter scale using a ruler. The printed scale must be consistent with the millimeter scale in the ruler.

HOW TO DETERMINE YOUR SHOE SIZE:
 If you've measured your feet then all you have to do is use that millimeter measurement to find your shoe size in the table.

Remember that every BIRKENSTOCK has its shoe size and millimeter size written in the footbed, which makes it easy to find a pair that fits.
